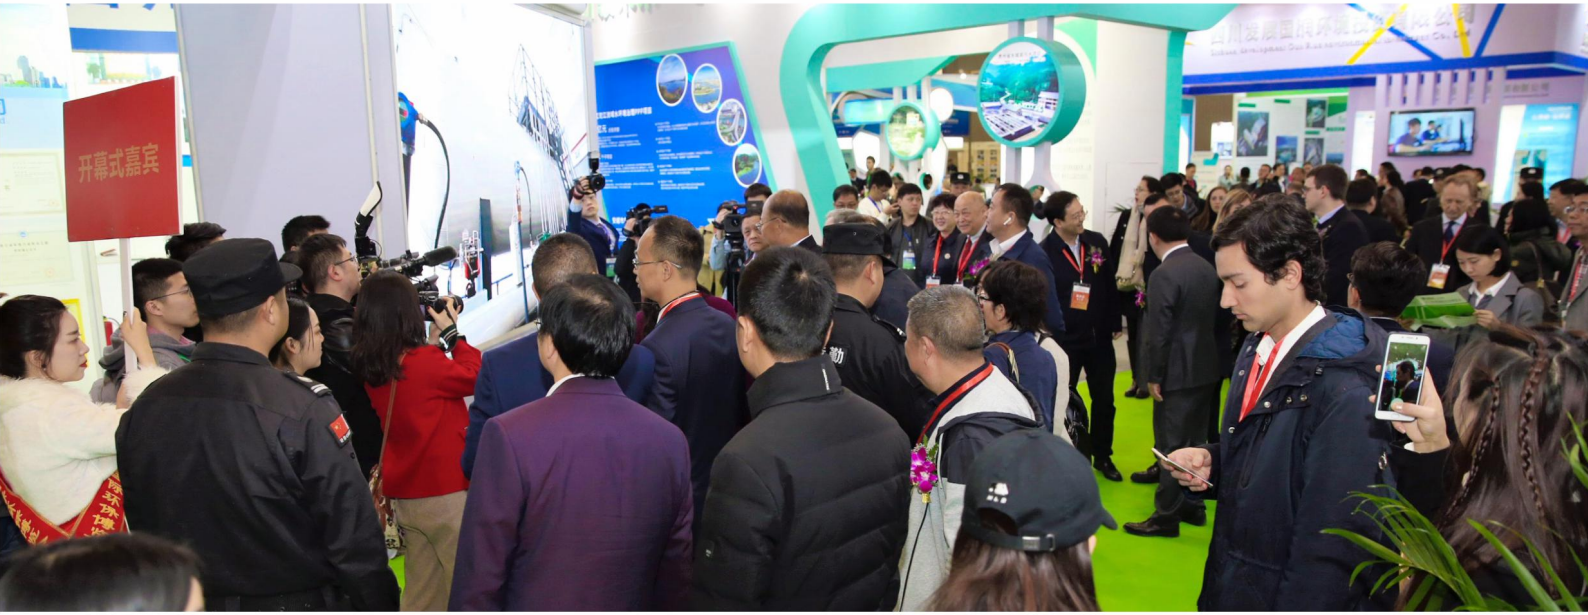
ABOUT THE MARKET

CDEPE- Chengdu Environmental Protection Expo, also known as the largest environmental protection exhibition in Western China, acts as a bridge between Southwestern China and the world green technology industry.

The Southwest of China covers a geographical area that accounts for 40% of China's total GDP.Represents a market with fast growth and enormous development potential in China, especially in the environmental protection industry.

Chengdu will play a key role in the "One Belt and One Road" project established by China's Central Government and is expected to become the logistic center of the southwestern China

To invest on Chengdu means to enter the Chinese business channel directly, avoiding the more crowded and saturated markets such as Shanghai, Beijing.



OVERVIEW OF CDEPE2019

13	COUNTRIES & REGIONS OF EXHIBITORS
30,000	SQM EXHIBITION AREA
403	EXHIBITORS
22,033	VISITS
20+	CONFERENCES
