GLOBAL WATER *expo*

THE WATER INDUSTRY MARKETPLACE OF ECOMONDO

Global Water Expo is

Ecomondo's marketplace for the water industry, a result of the partnership between **Ecomondo** and **UTILITALIA** (Italian Association of Public Utility and Environmental Services). Dedicated to all stages of the water cycle, Global Water Expo is the only event facilitating a meeting place where the top 110 Italian utility companies, ESCOs, industries and engineers can come together and meet the producers of cutting edge technologies.

Focus 2017

- **The water service** in a leading role in circular economy
- **Water reuse and alternative sources** for multiple purposes
- The market and potential financial and economic outlook for **water companies**
- Management of the infrastructures and **impact on tourism**
- **European and national legislation** and public perception
- **Risk analysis**, impact on the environment and decarbonisation
- **Horizon2020's** innovative measures with italian coordination and participation
- **Monitoring and integrated management** of water networks and basins
- Use of **robotics** and **artificial intelligence**
- **Big data** and **internet of things** applied to the management of water resources
- Innovative **no-dig** techniques
- **Emerging Contaminants**
- **Social dimension** and **active participation** of citizens
- The **water saving** techniques in the **agriculture industry**

New at the Expo 2017

The "Utilities Plaza" will be created at the centre of Hall D1, which will host **Global Water Expo**, to promote networking between the world of national and international utilities and technology-producing companies. A genuine stage will be set up in this area on which companies can present their top products to a public of top utilities. The programme for the four days of the Utilities Plaza will be coordinated by **UTILITALIA** (Italian Association of Public Utility and Environmental Services).

Exhibitor Profile

- WATER TREATMENT, PURIFICATION AND DESALINATION SYSTEMS
- WASTE WATER AND RAINWATER TREATMENT AND REUSE
- PURIFICATION SLUDGE TREATMENT AND DISPOSAL
- URBAN, AGRICULTURAL AND INDUSTRIAL PURIFICATION SYSTEMS DESIGN AND MANAGEMENT
- TREATMENT AND PURIFICATION PROCESSES, PRODUCTS AND SYSTEMS
- INDUSTRIAL PROCESSES AND WASTE WATER TREATMENT
- CHANNELS, PIPES, VALVES AND JUNCTIONS
- DRAIN WELLS
- PUMPS, TURBINES, INVERTERS, CONTROLLERS
- MONITORING AND ENERGY EFFICIENCY SYSTEMS
- METERS, SENSORS AND DATA MANAGEMENT
- REMOTE CONTROL SYSTEMS
- DRINKING WATER DISTRIBUTORS
- DOMESTIC PURIFIERS

2016 SUCCESS IN NUMBERS

130
exhibiting companies

6,500
m² of exhibition area

10
high-profile Conferences with an international scope involving issues such as the Water-Energy-Carbon Nexus

more than
6.000
foreign buyers from Turkey, Egypt, Algeria, Tunisia, Morocco, the Czech Republic, Hungary, Bulgaria, Poland, the Balkans, Russia, Brazil, the United Arab Emirates, Oman, Israel and China

7
training workshops on innovative subjects such as MBR, sewer networks, and new technologies for water treatment using UV and Ozone
