

The international
B2B2G platform for
Green Technologies Industry
in the West of China

The West of China represents a market with fast growth and enormous development potential in China, especially in the environmental protection industry.

Of particular interest is especially the so called «West Triangle Economic Zone» which includes the cities of **Chengdu**, **Chongqing** and **Xi'an** and covers a geographical area that accounts for 40% of China's total GDP.

Chengdu will play a key role in the «**One Belt One Road**» project established by China's Central Government and is expected to become the logistic center of the southwest of China.

To invest in Chengdu, means to enter the Chinese business channels in an area that has a strong appetite for international knowledge and technology , avoiding the more crowded and competitive markets such as Shanghai, Beijing, Shenzhen or Guangzhou.

Chengdu Environmental Protection Expo (CDEPE) is the largest green technology trade show in Western China market. The show is co-organized by *Sichuan Environmental Protection Industry Association (SAEPI)* and *Europe China Environmental Exhibitions (ECEE)* – an Italian Exhibition Group’s Chengdu based company.

The show has a strong institutional support by important government bodies such as *Sichuan Environmental Protection Bureau, Chengdu Environmental Protection Bureau, Chengdu Expo Bureau*, etc.

Since the 2019 edition, CDEPE counts on the expertise of ECOMONDO to further develop towards internalization, by bringing more **international content of high level**, creating an **international scientific committee** of experts from around the world that will guide the contents of the show, tailor make **B2B (business to business)** and **B2G (business to government) match-making activities** for the international enterprises that are looking to expand their business in these markets, with the purpose to bring them closer to the Chinese companies, governmental bodies and policy makers.
