Scenario

Climate change and extreme natural phenomena are affecting the balance of life on the planet every day.

We need to speed up the transition to the circular economy to meet the goals of the Green Deal but also to ensure greater strategic autonomy for Europe and Italy in the supply of raw materials.

2023 will be important for the roll-out of investments (funding for circular economy systems) and reforms (National Strategy for the Circular Economy and National Waste Management Programme) envisaged in the Next Generation EU.

At European level, the new Circular Economy Action Plan and the new Industrial Programme for the Green Deal will continue to be implemented.

Italy is among the leading countries in Europe, but it is still proceeding too slowly: it needs effective and consistent public policies to support the ecological transition (while ensuring their industrial and fiscal policies are appropriate), to overcome the barriers that impede the circular economy, and to fully exploit its potential.

Mission

Ecomondo is the meeting place where industrial groups, stakeholders, policy makers, opinion leaders, local authorities, research bodies and institutions come together and put in place the key elements that define **the strategies for the development of EU environmental policy.**

It is the key **international event in Europe** and the **Mediterranean basin** for technologies, services and industrial solutions in the **green and circular economy** sectors.

A hub for research and innovation, Ecomondo offers information, sharing and co-design on **European Green Deal** policies through the creation of public-private partnerships involved in national, European and international planning.

Over the four days of the event and throughout the year, Ecomondo addresses issues related to the **progress of Next Generation EU flagship projects** and the **level of adoption** in Italy, Europe and internationally of the **circular economy in the main industrial value chains**, as well as the restoration and **ecological regeneration** of soils and the hydrosphere, coastlines and circular and healthy cities.

It also provides information and networking opportunities on **funding for research and innovation** as well as new policies, and offers insights into the **new languages of communication** to facilitate the transition to sustainable processes and high-quality training opportunities at all levels, for those working in public administration, self-employed people, and sustainability managers and professionals.

Overview

Ecosystem

Ecosystem, sharing, network: just some of the terms that illustrate Ecomondo's mission as a **community catalyst**. This role is not limited to the days of the show, but extends throughout the year thanks to a series of **domestic and international events in which we are actively involved as organisers, co-organisers and partners**.

Chengdu International Environmental Protection Expo – CDEPE
28 - 30 March 2024

International B2B2G platform dedicated to the green economy and the ideal vantage point from which to identify Chinese policies and investments relating to decarbonisation.

Since 2019, it has been partnered by Ecomondo to further its development at international level, creating a scientific committee and fostering matchmaking opportunities between companies, institutions and policy makers.

cdepe.com

Ecomondo Mexico
17– 19 April 2024
Expo Guadalajara, Jalisco

The environmental technology event designed for the Latin American market.

It brings together technologies and solutions for the ecological transition and circular economy, fostering business and networking opportunities with Latin American investors and potential business partners.

Organised through a joint venture between Italian Exhibition Group and Hannover Fairs México.

ecomondo.mexico.com

Green Med Symposium
3 - 5 May 2023
Stazione Marittima, Naples

A three-day event dedicated to the ecological and digital transition, which will focus on Italy and the South, the fight against climate change, water, soil, energy and the circular economy.

The event is organised by Ricicla Tv, and since 2022 has been backed by Ecomondo's expertise as co-organiser.

greenmedsymposium.it

Facts & Figures 2022

79,200+ attendance, of which **10% international** delegates from **125 countries**

66 international associations

130,900 sqm gross exhibition space

1,405 companies of which **25% overseas**

181 events of which **42 international**

261,105 views on the digital platform GreenTech Insights

17 webinars throughout the year

780 mln media contacts

People

Why exhibit

Ecomondo hosts the leading companies in environmental services, solutions and technologies: water management, waste disposal, textiles, bioenergy, soil management and protection, transport, agriculture and sustainable circular and healthy cities.

BUSINESS

To achieve your economic and growth goals by developing new national and international markets.

COMMUNITY

To become part of an active and relevant community in the circular economy and ecological transition, multiplying training and networking opportunities.

BRAND VALUE

To present your brand and ensure it is visible, in an international context, to loyal customers and possible new contacts, presenting innovations and projects to the market.

UPDATES

To learn about trends, projects, technologies, news, funding, regulations and best practices to support the ecological transition, while maintaining an international outlook.

95% of exhibitors consider attending Ecomondo important for their business.
(2022 exhibitor survey)

Visitor profile

Visitors come to Ecomondo to **find out about innovations** (64.5%), **find new technical solutions** (46.5%), talk to **industry operators** (44%) and identify **new suppliers** (43.23%)*. In 2023, attendance is expected to exceed 90,000, including national and international visitors.

WHY VISIT ECOMONDO?

To meet stakeholders and professionals operating in the green & circular economy sectors.

To forge new partnerships and business relationships for future development.

To get informed about the latest sector news, regulatory principles, development opportunities.

To share ideas, projects, technologies, news and best practices in support of the ecological transition.

WASTE AS RESOURCE

Material Handling, Lifting solutions
Containers, collection, Transport & Logistic
Waste treatment and disposal technologies
and components

SITES & SOIL RESTORATION

Remediation and regeneration of contaminated sites
Reducing land consumption, redevelopment and reuse of
brownfield sites
Environmental damage prevention and emergency response

ENVIRONMENTAL MONITORING & CONTROL

Integrated monitoring solutions (water, air, soil)

SOUTH 
ENTRANCE

Area of over 130,000 sqm dedicated to the ecological transition.

INNOVATION ARENA

▲ SOUTH ENTRANCE

WATER CYCLE & BLUE ECONOMY

- Collection, purification, distribution
- Collection, purification and treatment of wastewater for industrial, civil and irrigation use
- Valorisation
- Digitisation: water 4.0, IoT, AI
- Water infrastructure management
- Efficiency: measurement, control
- Blue economy, aquaculture and fishing, desalination, marine litter

CIRCULAR & REGENERATIVE BIO-ECONOMY

- Chemistry from renewable sources: bioproducts, bioplastics
- Product and process eco-design
- Repair services

BIO-ENERGY & AGROECOLOGY

- Bioenergies: biomass, bioliquids
- Biogas: processes, products
- Cogeneration
- Precision farming

Exhibition

Exhibition focuses

Water Cycle

An organic representation of the entire water management and valorisation chain: from water capture to restitution to reuse, with a focus on innovations in **digital transformation**, key to improving water resource management. The stakeholders involved include the main **national and international utilities**, and **trade associations** such as Utilitalia, which has a dedicated area for its members and seminars.

WATER

Exhibition

Exhibition focuses

SAL.VE

The **Ecological Services Vehicles Expo**, organised in partnership with ANFIA, showcases the entire product range of equipment for industrial and special vehicles for waste collection and street sweeping.

All member companies have common goals: insourcing, quality and technological innovation.

Alongside Anfia members, the leading **truck manufacturers** will present full **electric solutions** in a dedicated test drive area.

SAL.VE

Districts

Textile District

The textile supply chain is represented at Ecomondo through the **Textile Observatory** which, now in its third edition, focuses on textile waste management by Italian municipalities. The main stakeholders will be present in a debate and exhibition area: waste producers and managers, consortia and associations, research and development institutes, textile treatment and valorisation plants, and the second-hand sector.

PNRR Observatory

Building on the new decrees passed by Italy's Ministry for Environment and Energy Security (MASE), which has greenlighted subsidies for 160 "flagship projects for the circular economy", the PNRR Observatory was set up to promote a number of **virtuous value chains: WEEE, paper and cardboard, and plastics**, transforming them into true exhibition districts.

The **WEEE District** is an industrial thematic path with a focus on technologies for repowering and building new plants for recycling waste from electrical and electronic equipment.

The **Paper District** is dedicated to paper and cardboard, with a focus on collection, logistics and recycling systems (in collaboration with Comieco).

The **Plastic District** is focused on the best solutions for the valorisation and transformation of plastics, with an industrial target relating to the creation of plastic recycling plants, including marine litter.

Districts

Start-Up and Innovation District

Ecomondo is consolidating its role as an **incubator** and **facilitator of innovative projects** by enhancing the Start-Up and Scale-Up Innovation area. A platform for dialogue between companies, investors and start-ups, which can make themselves known, meet potential partners and launch their own brand within an international exhibition. **More than 50 start-ups** are expected in 2023. The initiative is organised by Italian Exhibition Group, promoted in collaboration with the Italian Trade Agency and has ART-ER (Attrattività Ricerca Territorio) and Confindustria as its main partners.

Blue Economy District

The blue economy includes all economic sectors, traditional and emerging, related to the use of the sea, oceans and coasts, aquaculture and fishing, desalination and port infrastructure. The project could be the driver for the establishment and development of a cluster for the blue economy, able to guide the various sectors towards a high degree of innovation (technological, organisational and market) and sustainable development.

How to take part

STAND OPTIONS

Ecomondo and its whole team supports exhibitors in choosing the most suitable area to enhance their brand. Exhibitors can request a customisable bare area and draw on the know-how of IEG Group company Prostand to design the stand, or choose from the available pre-assembled stand models.

EXHIBITION RATES PER SQM

CATERING SERVICES:

Summertrade is the IEG Group company that organises Food & Beverage services throughout the exhibition centre and is ready to welcome requests and develop customised solutions.

How to take part

DIGITAL PACKAGES

Not just a physical space. Ecomondo offers exhibitors **multiple phygital and full digital participation formulas with GreenTech Insights (GTI)**, the community that brings together in one place all the shows in the Green & Technology sector organised by Italian Exhibition Group and is designed to offer virtual content throughout the year. This hybrid form of event means that the experience does not end with the trade show, but rather **multiplies opportunities for networking and business matching**.

BASE:

gives exhibitors access to the GTI digital hub that extends visibility over time and space through the network, multiplying contact and business opportunities.

SILVER | GOLD | PLATINUM (paid for): these offer features for interacting with visitors, greater visibility and customisation of the exhibitor profile.

BASE	included in the participation fee
SILVER	€ 1,500.00
GOLD	€ 2,550.00
PLATINUM	€ 6,500.00

<< JOIN THE COMMUNITY

The benefits of the GTI digital hub:
Community, Networking, Artificial Intelligence

Opportunities

Internationalisation

Through an integrated internationalisation strategy, Ecomondo is increasingly consolidating its position as a reference point for Europe and the Mediterranean basin, and boosting its reputation overseas. It fosters the presence of international exhibitors and visitors through:

- omnichannel communication on and offline;
- missions and participation at trade shows and conferences on the ecological transition abroad (e.g. Cop 27 in 2022);
- network of partnerships around the world to promote the show and the **Hosted Buyer programme**;
- dialogue with and involvement of numerous institutional representatives and international sector associations.

With this strategy, the number of countries with potential strong demand for innovative technologies and solutions for the ecological transition will be further increased.

INTERNATIONAL BUYER PROGRAMME

Thanks to the programme to retain and expand international delegates, in synergy with the **Italian Trade Agency** and the **Ministry of Foreign Affairs and International Cooperation (MAECI)**, at its last few editions, Ecomondo has met the challenging objective of fostering dialogue and business relations by involving **more than 500 international buyers** (2022 figure).

Innovation

Circular Healthy City

Cities currently occupy less than 3% of the Earth's surface, but are home to 50% of the population and are responsible for 75% of the natural resources consumed, 70% of gas emissions generated but also 70% of the world's GDP. Hence the need for cities to be **increasingly green and efficient in the management of water and energy resources, food and waste**, and thus **inclusive, safe, durable and sustainable** human settlements, as required by Goal 11 of the 2030 Agenda. **Circular Healthy City** is the exhibition and virtual venue that brings together the most innovative projects, solutions and models of circular and healthy cities developed internationally.

Communication, Young Generation and Influencers

A catalyst for the new generations, from Gen Z to Millennials, Ecomondo engages the younger generations by providing a platform to create synergies both in terms of new jobs (by matching supply and demand) and in terms of knowledge exchange, by presenting research projects, European funding calls as well as new technologies and best practices.

Events

Conventions programme

The jewel in the crown of Ecomondo 2023 will be the extensive and high-quality programme of conferences, seminars and events aimed at exploring the main technological, regulatory and market innovations in the **circular economy sectors of organic and non-organic value chains, water resource management and environmental monitoring & control, the regenerative economy and environmental risk prevention.**

To ensure the quality, innovative and international nature of the contents, the **Technical Scientific Committee** consists of a pool of 80 members that includes **scientists, technicians, managers and representatives of national institutions** (Ministries, including the Ministry for the Environment and Energy Security, the regions including Emilia-Romagna), **sector associations and federations** (Utilitalia, Assambiente, Confindustria, Confindustria Cisambiente, Federalimentare, Federchimica, Confagricoltura), **consortia** (CONAI, CIB, CIC), **agencies and institutes** (ISPRA, ENEA, Istituto Superiore di Sanità), as well as **European and international institutions** (i.e. the European Commission, OECD, EEA, FAO, etc.).

The international programme will mainly focus on Europe and the Mediterranean, and will be facilitated by the European Commission, the OECD, the FAO, the EEA, ISWA International and KICs.

Highlights

> **Status of national implementation of PNRR priorities and flagship projects** with a focus on the WEEE, paper-cardboard, textiles and plastics sectors;

> **Level of adoption, in Europe and internationally, of the circular economy in terms of process and product efficiency, eco-design, recycling and use of secondary raw materials** in the industrial value chains of the textiles, WEEE, plastics, paper-cardboard and construction sectors, with specific reference to the new “Green Deal Industrial Plan”;

> **Restoration and regeneration of ecosystems, soils and the hydrosphere**, with a focus on sustainable production and valorisation of agro-forestry resources (with the production of food, wood, paper, chemical compounds, materials and energy), sustainable use of water resources and the sea (**blue economy**), integrated management and valorisation of wastewater and municipal organic waste;

> **Green and circular cities**, fresher and healthier, more efficient management and consumption of food and use of water and energy resources, and management and valorisation of waste generated;

> **Research and innovation and European funding to support them; new national and European regulations, procedures and policies** governing their adoption, investment and financing, start-ups, creation of partnerships, training and communication.

Sponsorship

As a training and information hub, Ecomondo hosts technical and scientific content, panel discussions, workshops and conferences over the four days of the show and throughout the year, thanks to the digital extension. Networking, knowledge-sharing and engagement: **don't miss the opportunity to enhance your brand in a high-level technical, scientific and institutional environment** by choosing from a variety of sponsorship opportunities: on-site, hybrid and full digital.

ON SITE

Do you want to reach Ecomondo's convention audience?
Organise a convention by hiring the conference room and benefiting from all the promotional and marketing tools offered by the show.

From € 1,600

Sponsor a convention organised by the Scientific Technical Committee, and your brand will be displayed on all communication media.

From € 5,000

HYBRID

Starting with the on-site package, extend the visibility of your convention or brand by also incorporating the digital platform.

From € 7,500

FULL DIGITAL

The voice of the Ecomondo ecosystem but also of the GreenTech Insights community, there are several digital events throughout the year, including the **Digital Green Weeks**.

Choose how to be there: broadcast your event live and on demand using the Digital Hub and take advantage of all our promotional tools:

From € 1,000

Sponsor the digital platform and enhance the visibility of your brand

From € 500

Our commitment

Information

STATES GENERAL OF THE GREEN ECONOMY

States General of the Green Economy is a strategic, open and participatory process involving the main stakeholders of the Italian green economy.

It is the **key annual event for the Italian green economy**, promoted by the National Council for the Green Economy, in partnership with the Ministry for the Environment and Energy Security and under the patronage of the European Commission. It proposes policies and measures for the transition to the green economy in Italy, and provides an analysis and update of trends in strategic green economy sectors.

The initiative, which began in 2012, has become a point of reference for thousands of companies, and involved **more than 9,000 stakeholders** between 2012 and 2022.

SAFTE

SAFTE is the Advanced Training School for Ecological Transition promoted by Ecomondo-Italian Exhibition Group and directed by Alma Mater Studiorum - University of Bologna, in collaboration with ReteAmbiente. Its purpose is to offer public and private sector managers a tool aimed at enabling a green transformation of the organisational and economic models within their organisations, also in light of the new regulations recently introduced by European directives, by bringing together ideas, models, techniques and experiences.

safteformazione.it

Community

GreenTech Insights is the network that brings together the **communities** of the leading international shows of the **green & technology sector** organised by **Italian Exhibition Group** focused on the circular economy, the green economy, the energy and ecological transition, renewable sources, sustainable mobility and innovations.

It is active all year round and, through digital content and opportunities to also meet online, it is intended to **support and guide companies, stakeholders, start-ups** and all players in our industries to **act more ethically and responsibly** by using new digital technologies to meet **European climate neutrality targets** in 2050. Ecomondo is part of GreenTech Insights together with K.EY, DPE, IBE and Tecna.

Our commitment

IEG

#COMMUNITYCATALYST

We organize trade shows and conferences in Italy and throughout the world. We bring industries, relationships and experiences together. **We have the planet at heart.**

Italian Exhibition Group SpA has been organizing trade shows, events and congresses in Italy and around the world for more than 70 years. It offers its national and international partners **concrete business opportunities, content and services with high added value, and opportunities to meet.** Its activities are driven by its modern structures, highly professional approach, innovation and networking skills. It creates value for stakeholders by developing the economic growth of the region, and networking relationships and experiences.

IEG is a company listed on Euronext Milan, a regulated market organized and managed by Borsa Italiana SpA, has achieved, through its facilities in **Rimini and Vicenza**, a **domestic leadership position in the organization of trade shows and congresses.** It has also developed an international business, partly through joint ventures with global and local organizers (such as in the United States, United Arab Emirates, China, Mexico, Germany, Singapore, and Brazil) that have made it one of the leading European operators in the sector.

Where we operate:

Italy: Rimini, Milan, Vicenza, Arezzo

World: Chicago, Dubai, Munich, New York, Oakland, San Paolo, Singapore

Our commitment

Green Core

Italian Exhibition Group was one of the first and most important players in Europe to obtain **ISO 20121 certification** for its venues, the exhibition centres in Rimini and Vicenza, the Palacongressi in Rimini and for the organisation of Ecomondo. An ambitious path that commits the company to a mission that encompasses separate waste collection, industrial processes of material recycling, and which, going forward, requires prevention and the adoption of circular economy models, but also a heavy reduction in the use of materials and energy.

Our commitment

The land of sustainability

EMILIA-ROMAGNA

With a three-year implementation plan for 2022-2024, the Emilia-Romagna region is leading the necessary acceleration of the ecological transition. Thanks to the funds and strategies set out in the Pact for Work and Climate, it is combining productivity, equality and sustainability. An ecosystem with a wealth of cooperating institutions and companies based on the “Motor Valley” model, an area of considerable appeal to international investors.

RIMINI

Established as the national capital of the green economy, it is in the top 20 most virtuous urban centres in terms of eco-sustainability, according to the 29th “Ecosistema urbano” report produced by Legambiente and Ambiente Italia Srl.

Our commitment

Rimini Experience

A land of bell towers, turrets, endless plains, the Apennines, beaches, all the way down to the sea: **Emilia-Romagna**, famous the world over as the land of hospitality, is the place where different experiences come together in an unexpected journey through culture, nature, food and wine.

“Slow” and lively, traditional and ready for innovation, conservative but dynamic: Emilia-Romagna embodies so many souls and is moving into the future as **one of the regions driving change in Italy**.

With this mix of wellness, new emotions and traditional flavours, **Rimini, land of villages and fishermen**, is a city on a human scale with over 2,000 years of history to tell. Shopping, art and museums, restaurants, leisure/wellness offers and parks make up the rich offering that Rimini offers its guests after the trade show.

HOW TO GET HERE

Strategically located halfway between northern and southern Italy, and part of a dense transport network, Rimini is easy to get to from both Italy and abroad.

Getting to Rimini is quick and easy by car, train and plane! In Rimini, everything is within walking distance, and getting around is eco-friendly.
