Risk mitigation structures for fast landslides

Language: Italian

Organized by: Ecomondo Scientific-Technical Committee & Italian Geotechnical Society

Climate change is a topical issue and the landslide risk mitigation has become crucial for next generations. The Agenda 2030 for Sustainable Development of United Nations also adds an old-new challenge: how to combine the land use with the preservation of natural resources and the prevention of disasters. Among the most widespread and often severe hazards, fast landslides (debris flows, debris avalanches, debris floods, etc) is the class characterized by the largest destructive potential, involving huge soil/rock masses, travelling very fast and even along gently inclined slopes.

This conference deals with the reduction of the risk posed by fast landslides in a modern framework of optimizing structural efficiency and reducing both construction costs and environmental impact. Examples of structures (reinforced embankments, filtering barriers, permeable racks, flexible nets, etc) employed to either stop or deviate the flowing masses will be considered. The approaches and methods nowadays available for design will be illustrated. The main focus of the conference will be on: (i) the reliable assessment of the input data, which is crucial for the correct choice of the structure, its positioning and for the specific design; (ii) the adequate analysis of the dynamic interaction between flowing mass and protection structure.

Programme

9.30-10.00 Registration

10.00-10.15 Introduction

Nicola Moraci (IGS - Italian Geotechnical Society President)

Daniele Cazzuffi (IGS - Italian Geotechnical Society President)

Session 1: Features and design of protection works

Chair: Claudio di Prisco (Polytechnic of Milan)

10.15-10.45 *Risk mitigation structures: classification and fields of application*

Giovanni Vaciago (Studio Geotecnico Italiano - Italian geotechnical study, Milano)

10.45-11.15 *A frame work for design: advanced approaches*

Sabatino Cuomo (University of Salerno)

11.15-11.45 *Protection earthworks*

Francesco Calvetti (Polytechnic University of Milan)

11.45-12.15 *Design of reinforced embankments*

Piergiorgio Recalcati (Tenax SpA, Viganò)

12.15-13.00 *Discussion*

Session 2: Applications and case histories

Chair: Sabatino Cuomo (University of Salerno)

14.15-14.45 *Use of metallic wires along mountain creeks*

Marco Greco (GeobruGG Italia srl, Bergamo)

14.45-15.15 *Monitoring of protection structures against channelized landslides*

Fabio de Polo (Civil Protection Agency of Bolzano-Mountain Basins Bolzano)

15.15-15.45 *Slit-check dams: assessments of impact forces and retaining efficiency*

Marina Pirulli (Polytechnic University of Turin)

15.45-16.15 *Solutions for mitigation of flow-like landslides*

Rinaldo Uccellini (Officine Maccaferri Italia srl, Zola Predosa)

16.15-16.45 *Performance of a reinforced embankment for protection against fast landslides*

Luis Russo (Huesker srl, Trieste) and Marco Balducci (Progetto Associati Area, Perugia)

16.45-17.30 *Discussion and Closure*

Daniele Cazzuffi (CESI SpA, Milano) e Nicola Moraci (President of AGI - Italian Geotechnical Association)

09:30 - 18:00

Tiglio Room A6 Pav

WASTE MANAGEMENT AND VALORIZATION*Ecomondo Event - Call for Papers***Sustainable technological innovations for material and energy recycling and recovery**

Language: Italian

Organized by: Ecomondo Scientific Technical Committee, Italian Chemical Society – Division Environmental and Cultural Heritage Chemistry, ATIA – ISWA**CALL FOR PAPERS**

The aim of a decoupling between the advisable economic development and the undesirable depletion of planet resources requires a huge effort towards a technical improvement, able to implement new processes to close the cycles in all productive value chains.

A first important European initiative, in line with the new Circular Economy Action Plan, has recently been delivered, in relation to batteries (industrial, automotive, electric vehicle and portable), but the ambitious targets fixed by EU for the next years cover many priority sectors (plastics, packaging, WEEE, textiles, building and construction, food).

This seminar thus intends to show some advanced initiatives of technological innovations which could be applied to different categories of residues, by-products or discards, both industrial and urban, with the aim of improving resources circularity and valorisation.

Section Chairs

Fabrizio Passarini, Ecomondo Scientific Technical Committee, University of Bologna
Mauro Majone, Ecomondo Scientific Technical Committee, University "La Sapienza" Rome
Paola Muraro, ATIAISWA ITALIA

Programme

9.30-9.45 Introduction by the Chairs and a short summary on the papers presented through posters

9.45-10.45 Invited lectures

9.45-10.00 Antonio Protopapa, COREPLA
The frontiers of plastic mix chemical recycling

10.00-10.15 Fabio Assandri, R&D & Technological Innovation Director, Versalis
Versalis: Hoop® a sustainable recycling of mixed plastics project

10.15-10.30 Paolo Pavan, Università "Ca Foscari" di Venezia
A framework of present possibilities and perspectives of carbon recovery from waste flows

10.30-10.45 Letizia Tuccinardi, ENEA
Recycling processes for end of life face masks: hypotheses for a sustainable value chain

10.45-17.15 Presentations selected from the Call for papers

10.45-11.00 Cailotto A., Mantovani M., Zanetti N., Della Zassa M. (KINN-Tech s.r.l., Spin Off of the University of Padova, www.k-inntech.it), Canu P. (Industrial Engineering Department, University of Padova, Via Marzolo 9, 35131, Padova)
Inertisation treatments of waste metallic powders

11.00-11.15 Antonio Castorini, Tiziano Canali, Paride Festa Rovera (TBF+Partner AG)
The recovery of metals from the fly ash of waste-to-energy plants

11.15-11.30 Daniele Ricci, Matteo Carfagno, Matteo Maiello, Paolo Magaldi (Magaldi Power S.p.A., Salerno)
Magaldi Ecobelt® WA On site valorization treatment of dry IBA as a revenue opportunity for WtE plants

11.30-11.45 Francine Duarte Castro, Mentore Vaccari (University of Brescia, Italy), Laura Cutaia (ENEA, Italy)
An experimental design approach for recovering materials from automotive lithium-ion batteries

11.45-12.00 Marco Molica Colella, Vittoria Novelli (CiaoTech S.r.l.)
Development of an Efficient Microwave System for Material Transformation in energy INTensive processes for an improved Yield

12.00-12.15 Loretta Venturini, Fabrizio Meroni (Iterchimica S.r.l.)
The valorization of waste plastics in durable asphalt concrete: the Genova San Giorgio Bridge

12.15-12.30 Martino Colonna, Lorenzo Crosetta, Alessandro Nanni (DICAM-UNIBO), Massimo Rinaldi (Warrant Hub)
Complete recycling of end-of-life sport equipment: the LIFE RE-SKIBOOT Project

12.30-12.45 Rosa Turco, Riccardo Tesser, Martino Di Serio (Department of Chemical Sciences, University of Naples Federico II), Salvatore Mallardo, Mario Malinconico (Institute for Polymers, Composites and Biomaterials - IPCB, National Council of Research - CNR)
Recycling Expanded Polystyrene (EPS): Giving a new life to a waste

12.45-13.00 Marlene Scalise (ass. culturale Riscarti), Flavio Ottaviani (Energy manager)
"Riscarti festival" and the sustainability culture

13.00-14.00 Break

14.00-14.15 Elena Rubino, Marco Botta, Gianluca D'Aquila (Eni Rewind)
Sustainable technological innovations for the recycling and recovery of materials and energy

14.15-14.30 Silvia Codelupi (COOPBOX GROUP S.P.A)
GLOPACK project: from biomass recovery to food packaging

14.30-14.45 Luisa Di Paola (Faculty of Engineering, Università Campus Biomedico di Roma)
REWINE: a biorefinery platform based on winery wastes

14.45-15.00 G. Metelli, R. Pagliarello (Università della Toscana), M. Garegnani (Politecnico di Milano, DAER), L. Nardi, A. Desiderio, M. Calvitti, E. Benvenuto, E. Lampazzi (ENEA, Biotechnology and Agro-Industry Division)
A lab scale insect-based microgreens waste recovery system

15.00-15.15 Coos Wessels (CirTec)
Optimisation of sewage treatment by recovery of cellulose

15.15-15.30 Giovanni Luca Russo, Maria Oliviero, Marco Baselice, Antonio Luca Langellotti, Paolo Masi, Raffaele Sacchi (Department of Agricultural Sciences & CAISIAL center, University of Naples Federico II, Italy), Vito Verardo (Department of Nutrition and Food Science, University of Granada, Spain)
Bioconversion of agri-food waste in high added value molecules through microalgae cultivation

15.30-15.45 Rachele Malesani, Alberto Pivato (DICEA, Department of Civil, Architectural and Environmental Engineering, University of Padova), Andrea Schievano (Department of Environmental Science and Policy, University of Milan)
Compost Heat Recovery Systems as alternative plants to provide domestic heating from residual biomasses

15.45-16.00 Marazza, D. (Università di Bologna), Contin, A., Hornung, A., Daschner, R., Eder, S., Ouadi, M., Jahangiri, H., Graute, L., Zhou, J., Liefink, D., Grassi, A., Capaccioli, S., Righi, S., Lama V., Rapone, I., Langley, M., Tuck, C., Claret Carles
To-Syn-Fuel: renewable liquid fuels and hydrogen from sewage sludge in a 500 kg/h real plant

16.00-16.15 Lorini L., Villano M., Majone M. (Department of Chemistry, University of Rome La Sapienza), Valentino F. (Department of Environmental Science, Informatics and Statistics, Ca' Foscari University of Venice), Battista F., Monarin G., Rizzoli F., Bolzonella D. (Department of Biotechnology, University of Verona)
Degradability of waste derived bioplastics: assessment and evaluation of BMP

16.15-16.30 Giovanni Gadaleta, Sabino De Gisi, Giusy Santomasì, Francesco Todaro, Michele Notarnicola (Dipartimento di Ingegneria Civile, Ambientale, del Territorio, Edile e di Chimica, Politecnico di Bari, Italy)
Influence of cellulose acetate as a bio-plastic on the yield of combined anaerobic digestion and composting treatment

16.30-16.45 Massimo Mari, Antonella Macagnano (CNR - Istituto sull'inquinamento atmosferico), Fabrizio De Cesare (Università della Toscana - DIBAF), Carla Mazziotti (CNR - Dipartimento di Ingegneria ICT e Tecnologie per l'Energia e i Trasporti)
Electrospinning technology for eco-design in planning through the recovery of agro-food waste

16.45-17.00 Valentina Beghetto, Riccardo Samiolo (Crossing Srl)
Antimicrobial Waterproof Recyclable Environmentally Sustainable Clothes

17.00-17.15 Nelson Marmiroli (Consorzio CINSA, Parma, Italy), Matteo Cauli, Marco Ruggi (Ri.Circola Srl, Milan, Italy), Lucia Toffanin; (INDICAM, Milan, Italy)
Sustainable solutions for the disposal of seized, counterfeit goods: solutions for recycling

17.15-17.30 Discussion and closure

Poster Session

WMV1-P1 STEPPER SCREEN: il nuovo brevetto di PAL per vagliare il rifiuto / Tommaso Zanasi (PAL srl)

WMV1-P2 Come la regolazione Arera può influenzare la qualità dei servizi di gestione integrata dei rifiuti / Giorgio Ghiringhelli (ARS ambiente Srl e Università Cattaneo – LIUC), Carlo Sguario, Paolo Pagani, Monica Benzi, Giuseppe Sbarbaro (UTILITEAM Srl)

WMV1-P3 VOW - Valorising Organic Waste / Stefano Santini (Nest srl)

WMV1-P4 New sizing strategies to improve recovered carbon fibres reinforcement on polymer composite / Miquel Royo, Marc Martín, Luis Grandá, Diego Morillo, Ruth Garcia, Núria Portolés (LEITAT Technological Center)

WMV1-P5 Il recupero dell'Olio da Disoleatore / Elisabetta Piana (Karberg & Henenmann srl)

WMV1-P6 Circular economy design da waste ad opportunità aziendale / Dr. Alberto Claudio Tremolada (Competence center manufacturing & exhibitions manager Adaci - Associazione It. Acquisti e Supply Management)

WMV1-P7 FLIES4VALUE - Insetti per la bioconversione di sottoprodotti agroalimentari / Lara Maistrello (BIOGEST-SITEIA UNIMORE), Lorenzo Bertin (CIRI AGRO UNIBO), Maria Grazia Tommasini (CBPV Soc. Coop.)

(BIOGEST-SITEIA UNIMORE), LORENZO BERTINI (ENEA), MARIA GRAZIA TOMMASINI (ENI V SOC. COOP.), Federica Rossi (Proambiente S.C.r.l.), Augusta Caligiani (SITEIA.PARMA UNIPR)

WMV1-P8 Tenebrio molitor: innovative tool for food loss and waste valorisation and biopolymers recovery/ Simona Errico, Anna Spagnoletta, Stefania Moliterni, Salvatore Dimatteo, Alessandra Verardi, Paola Sangiorgio, Ferdinando Baldacchino, Roberto Balducchi (ENEA - Centro Ricerche Trisaia)

WMV1-P9 New biochar-based composite for phosphorous recovery from wastewater / Carlotta Carlini, Alessia Alcantarini, Nicolas Greggio, Antonio Primante, Andrea Contin, Diego Marazza (CIRSA - Interdipartimental Research Centre for Environmental Science, Alma Mater Studiorum – Università di Bologna)

WMV1-P10 REE, critical raw material and geopolymers recovery from fly ashes / Paolo Plescia (Resilco Srl), Ivana Moscato (B1Shop Srl), David Callejo Munoz (Resilco Srl)

WMV1-P11 Plastic waste pretreatment for chemical recycling / Paolo Plescia (Resilco Srl), Ivana Moscato (B1Shop Srl), David Callejo Munoz (Resilco Srl)

WMV1-P12 GLycerol to Aviation and Marine prOducts with sUustainable Recycling / Patrizia Circelli (Ciaotech srl)

WMV1-P13 Estrazione di metalli da ceneri pesanti di termovalorizzazione di rifiuti urbani./ Carlo Limonti, Giulia Maria Curcio (Università della Calabria, Rende, Cosenza), Roberta Caruso, Francesco Marchio, Alessio Siciliano (Econet srl, Lamezia Terme, CZ)

WMV1-P14 Mercati locali di qualità e applicazioni di economia circolare/ Marino Cavallo (Città Metropolitana di Bologna)

WMV1-P15 Il recupero di rifiuti plastici con processo di pirolisi in Italia: Aspetti tecnici e normativi / Dott. Federico Pelizzari (Green Evolution S.r.l. Società Benefit), Prof. Ing. Gianclaudio Fausone (Politecnico di Torino)

WMV1-P16 FREL P BY SUN (Full Recovery End of Life Photovoltaic BY the energy from the SUN) / Lodovico Ramon (R&D Manager TIALPI SRL)

WMV1-P17 Gruppo CAP: Innovazioni tecnologiche sostenibili nel servizio idrico integrato / Desdemona Oliva (Gruppo CAP)

WMV1-P18 Nuove tecnologie di trattamento del sottovaglio da selezione dei RUR per recupero di materia / Domenico Ruggiero (S.A.P.NA. SpA - Sistema Ambiente Provincia di Napoli)

WMV1-P19 Soluzioni innovative per la gestione di impianti di confinamento e di percolati complessi: il caso di Progeco Ambiente SpA che sfrutta geofisica e fitodepurazione / Breda S., Zanolli A., Cantale V., Scanferla P., Argese E. (Fondazione Università Ca' Foscari di Venezia), Finotti Francesco, Finotti Franco, Tonelli A. (Geotila srl), Giovane G., Bonacina G. (Progeco Ambiente SpA), Castellaro C. (Moho srl), Criscione P. (Desam srl)

WMV1-P20 Sustainable food packaging from agro-waste: from Nature for Nature / Annamaria Celli, Laura Sisti, Micaela Vannini (DICAM, University of Bologna), Giuseppe Vignali (Department of Engineering and Architecture, University of Parma), Silvia Folloni (Open Fields Srl., Colorno, PR).

WMV1-P21 COMPOSER project - Innovative composite material for sustainable Circular Economy models / Marco Diani, Eleonora Manarin, Gianmarco Enrico Griffini, Marcello Colledani (Politecnico di Milano)

WMV1-P22 Evaluation of emissions generated from combustion of compost and lignocellulosic biomass/ Francesco Gallucci, Enrico Paris, Monica Carnevale, Adriano Palma, Beatrice Vincenti (Council for Agricultural Research and Economics, CREA-IT), Raffaele Mancini, Marco Calcopietro (Aster Energetica Srl), Ettore Guerriero (CNR-IIA)

WMV1-P23 Nuove soluzioni per l'economia circolare: riduzione volumetrica e valorizzazione carbon-negative / Luigi Iannitti (Chief Innovation Officer - RESET Srl), Anna Curatolo (R&D Engineer - RESET Srl), Andrea De Silvestri (R&D Engineer - RESET Srl)

WMV1-P24 L'impatto ambientale prodotto dal Covid-19 / Mangiagli Sebastiano (Istituto di Istruzione Superiore "A. Ruiz", Augusta)

WMV1-P25 Materials recovery from EoL mobile phones: the portent project / Danilo Fontana, Massimiliana Pietrantonio, Stefano Pucciarmati, Federica Forte (ENEA, Department for Sustainability, Via Anguillarese 301, 00123, Rome, Italy)

WMV1-P26 Plant cell cultures for bioconversion of industrial food waste into high value chemicals. / Maria Oliviero, Antonio Luca Langellotti, Andrea Donadio, Marco Baselic*, Anna Martello, Paolo Masi (CAISIAL, Università di Napoli Federico II, Portici, NA), Antonino Pollio (Dipartimento di Biologia, Università di Napoli Federico II).

WMV1-P27 C-SERVEES project: development of the Logistic Platform to enable the re-use of WEEE/ Sara Fozza, Marta Speranza, Davide Maglio (RINA Consulting)

WMV1-P28 The innovations in recycling and recovery of materials and energy in management of municipal solid waste in Catania / Elisabetta Chiara, Tommaso Alberto Vazzano, Fausto Scaro, Agata Matarazzo (Department of Economics and Business, University of Catania, Catania, Italy), Franco Corso, Letterio Mario Tringali, Salvatore Fiscella (Department Integrated System of Urban Hygiene, Municipality of Catania, Catania,

Italy)

WMV1-P29 Reversible Technologies towards Circular Constructive Products / Tecla Caroli, Andrea Campioli, Monica Lavagna (Dipartimento di Architettura, Ingegneria delle Costruzioni e Ambiente Costruito, Politecnico di Milano)

WMV1-P30 MTR E PEF: novità, scadenze, tool / Pasquale Lepore (direttore tecnico Officine Sostenibili srl ed Excogito società di ingegneria, componente direttivo PAYT Italia)

WMV1-P31 Troppi ostacoli alla circular economy: per realizzare il PNRR serve un cambio di mentalità / Alessandro Kiniger (B&P Avvocati)

WMV1-P32 Sustainable roads – revamping of asphalt production plants for the compliance to "Circular Economy Package" and "PAN GPP" requirements. / Claudia B. Mosangini, Roger M. Midence, (Ecosurvey®, Bologna), Christian Fontana (Dipartimento di Ingegneria Industriale, Università di Padova)

WMV1-P33 Sistema di Accumulo Energetico Urbano Integrato per Smart City e Mobilità elettrica./ Antonio Caloro (Environ Governance)

WMV1-P34 The circular economy, monitoring and control / Jani Hautaluoma (LNG & Renewable gas, Senior Business Manager, Valmet Automation Inc.)

WMV1-P35 La valorizzazione energetica del rifiuto – l'impianto del COGESA S.p.A. / Stefano Margani, Davide Amadio, Paola Di Iorio, Federica Pantano, Fabrizio Santini (COGESA S.p.A.)

WMV1-P36 Yarrowia lipolytica as a sustainable microbial platform for value added compounds production from Waste Cooking Oils / Antonino Biundo, Mattia Colacicco, Cosetta Ciliberti, Ruggiero Gorgoglione, Gennaro Agrimi, Isabella Pisano (Department of Biosciences, Biotechnology and Biopharmaceutics, University of Bari, Italy)

WMV1-P37 Tecnologie avanzate di upgrading del biogas ai fini della valorizzazione energetica / Cieri V., Zarra T., Belgiorno V., Naddeo V. (Laboratorio di Ingegneria Sanitaria Ambientale (SEED), Dipartimento di Ingegneria Civile, Università degli Studi di Salerno)

WMV1-P38 Efficient enzymatic degradation of poly(ϵ -caprolactone) by a commercial lipase / Angela Romano, Antonella Rosato, Grazia Totaro, Giulio Zanaroli, Annamaria Celli, Laura Sisti (Dept. of Civil, Chemical, Environmental and Materials Engineering, Alma Mater Studiorum - University of Bologna, Italy)

WMV1-P39 AGRINNOV - Processi di innovazione per la valorizzazione degli scarti e la riduzione dello spreco alimentare / Roberta Scassa (Università luav di Venezia), Daniel Collenzini (Università luav di Venezia in partnership con Agricom S.r.l.)

WMV1-P40 Technological innovation applied to the production of customized padel rackets / Antonio Grasso, Annamaria Visco (Engineer Department, University of Messina, Institute of polymers and composite biomaterials, CNR-CT), Giuseppe Abramo (KRC, kateneracingcomposite), Michela Gentile, Agata Matarazzo (Department of economics and business-University of Catania)

WMV1-P41 COMPOSER project - Carbon-fiber reinforced cOMPosites for Sustainable circular Economy models based on Repair and Remanufacturing for Reuse / Eleonora Manarin, Marco Diani, Marcello Colledani, Gianmarco Griffini (Politecnico di Milano)

WMV1-P42 Gli accumulatori elettrici nel settore automotive, gli impatti sull'ambiente e il rischio sull'uomo / Massimiliano Donia (Auditor di Terza Parte IATF e VDA 6.3), Mastrangelo Pasquale, Grazia Trivisonno, Alessia Donia, Nicandro Nardolilli.

WMV1-P43 Waste valorization to replace fossil-based additives in Hot Mixed Asphalts / Valentina Beghetto, Riccardo Samiolo (Crossing Srl)

WMV1-P44 The circular economy, monitoring and control / Jani Hautaluoma (LNG & Renewable gas, Valmet Automation Inc.)

Transforming plastic litter into new chemicals? Opportunities and challenges for innovative pyrolysis plants - SESSION WITH STREAMING IN ITALIAN LANGUAGE

Language: English

Simultaneous translation: Italian

Organized by: Ecomondo Scientific Technical Committee and CINEA (Sustainable Blue Economy Unit)

The workshop will gather innovators, local and ports authorities, legislators and stakeholders, e.g. plastics association and fishers and vessels, to discuss the opportunities offered by pyrolysis plants to convert plastics waste into new chemicals. At the same time the technical and legislative barriers that hinder the exploitation of this kind of technologies will be addressed.

The workshop will tackle plastics coming from different waste streams, and will specifically focus on the use of low temperature pyrolysis plants to treat marine litter.

Section Chairs

Luca Marangoni, Deputy Head of Unit, European Climate, Infrastructure and Environment Executive Agency (CINEA)

Andreea Strachinescu, Head of Unit "Maritime Innovation, Marine Knowledge and Investment", Directorate-General for Maritime Affairs and Fisheries (DG MARE), European Commission

Programme

10.00-10.30 Registrations

10.30-10.35 Welcome message

Luca Marangoni, Deputy Head of Unit at CINEA, European Commission

10.35-10.45 *Sustainable Blue Economy and Marine Litter: where we stand*

Andreea Strachinescu, Head of Unit at DG MARE, European Commission

10.45-11.00 *The case of the EU funded project marGnet*

Gian Claudio Faussonne - Sintol s.r.l., Fantina Madricardo - Cnr-ISMAR

11.00-11.15 *The case of the EU funded project LIFE ECOMETHYLAL*

Alberto Barranca Jiménez, AIMPLAS

11.15-11.30 *The case of the port of Moerdijk (NL)*

Jayand Baladie, Port Authority of Moerdijk

11.30-12.30 *Round table discussion on sustainable options for tackling plastics waste, including marine litter: regulatory and market challenges*

Paola Migliorini, European Commission, DG Environment

Laura D'Aprile, Italian Ministry of the Environment

Hervé MILLET, PlasticsEurope

Simona Giovagnoni, ANSEP UNITAM

Ángela Cortina, Fishing Vessels' Owners' Cooperative of the Port of Vigo – ARVI

Rita Sousa, Blue Pioneers

Agrifood post Covid: needs, critical issues and opportunities through the experiences of agri-food companies

Language: Italian

Organized by: Ecomondo Scientific and Technical Committee and National Agrifood Cluster CL.A.N.

The Italian agri-food industry never stopped its activity during the pandemic crisis, showing resilience, flexibility and a sense of responsibility. The sector has once again enhanced its countercyclical qualities, ensuring the availability of food, even in an extremely difficult context caused by overheating demand. Despite this, however, it must be said that the agrifood sector is also not crisis – free and has suffered large losses, mainly due to the closure of the HORECA channel. The need to face the critical issues related to the pandemic, to return to normality as quickly as possible, has highlighted the importance of a unified approach in dealing with the post-Covid restart by all the national stakeholders of the agrifood sector, which is the inspiring principle of the Cluster CL.A.N. itself. The workshop will be an opportunity to illustrate the Position Paper written by CL.A.N. on the critical issues, needs and opportunities of the agrifood sector related to the pandemic and the measures taken by the agrifood businesses to face the crisis both on the internal side (production organization), and on the external one (logistics matters on food supply and delivery), with the involvement of companies from different supply chains. Finally, the event will be an opportunity to illustrate the Three-Years Action Plan submitted to the Ministry of University and Research, as well as the actions undertaken.

Section Chairs

Mauro Fontana (President of CL.A.N. - National Agrifood Cluster)

Paolo Bonaretti (Vice-President of CL.A.N. - National Agrifood Cluster)

Massimo Iannetta (President Scientific and Technical Committee of CL.A.N. - National Agrifood Cluster)

Programme

10.00 Introduction by Mauro Fontana, President CL.A.N. - National Agrifood Cluster

10.10-10.25 The Position Paper of the Cluster CL.A.N. on the critical issues, needs and opportunities of the agri-food sector associated with the Covid emergency

Massimo Iannetta, President Scientific and Technical Committee CL.A.N.

Papers***Odor emissions: from abatement technologies to new control strategies**

Language: Italian

Organized by: Ecomondo Scientific Technical Committee, ISPRA, Italian Chemical Society, Division of Environmental Chemistry and Cultural Heritage**CALL FOR PAPERS**

The Ecomondo Odor Emissions conference (at its eleventh edition) is a flagship event for the community of most important industry and academic players. Researchers, Industry, Public administration and Environmental Agencies exchange their different experiences on a topic that is becoming of great relevance in environmental planning. As usual, the workshop will be opened with an update on the work of national and international technical committees on odor regulations. The following are planned: the interventions of the main public research bodies operating in this sector; the presentation of case studies and best practices by public administrations, control agencies and companies that develop technologies on the topic.

Section Chairs

Gianluigi de Gennaro, University of Bari Aldo Moro
Lucia Muto, ISPRA, Institute for Protection and Environmental Research
Gaetano Settimo, National Institute of Health

Program

10.00-10.05 Introduction
Gianluigi de Gennaro, University of Bari "Aldo Moro"

Invited speakers

10.05-10.25 *Innovative Photocatalytic cover for treatment of nuisance*
R.Kelly, SUEZ, Water Technologies & Solutions

10.25-10.40 *Odornet experience*
M.Sileno and G.Marchetti, ARPA Marche

10.40-10.50 *An update on the activities of the technical tables*
T.Zarra, University of Salerno

Presentations selected from the Call for Papers

10.50-11.00 *Results of the modeling elaborations carried out for a civil wastewater treatment plant using the two main modeling systems (Calpuff and Aermod) used for the evaluation of olfactory impact on the territory*
L.de Gennaro, M.Cortese, A.Dipalma, F.Dagostino, P.Lagioia, G.Corsini, P.Morisco - Lenviros srl, AQP SpA

11.00-11.10 *Influence of wind speed and temperature on the emission of VOCs from liquid surfaces: experimental study on the characterization of passive areal sources*
F.Tagliaferri, M. Invernizzi, L. Roveda, S. Sironi - Polytechnic University of Milan

11.10-11.20 *New technologies for the chemical characterization of odorous impacts*
A.Filippi, G.Cecchini, A.Frugis, C.Corradi, M.Giannuzzi, M.Spizzirri, L.Merluzzi - Acea SpA (Italian multi-utility group)

11.20-11.30 *Development of a methodology for monitoring odorous impacts in a Citizen environment*
A.Filippi, G.Cecchini, A.Frugis, C.Corradi, G.De Prosperis, M.Spizzirri, L.Merluzzi - Acea SpA (Italian multi-utility group)

11.30-11.40 *The management of odor emissions: the Eni Rewind experience at the Cengio site*
M.Barompriori, D.D'Emilio, G.Bonfedi, G.Repoli, M.Zuppini - Eni Rewind S.p.A

11.40-11.50 *Odor monitoring in the CAP Group purifiers: an evolving system*
D.Scaglione - CAP Group

11.50-12.00 *Occupational risk assessment for examiners involved in olfactometric analyzes*
E.Polvara, A.Spinazzè, M.Invernizzi, A.Cattaneo, S.Sironi, D.Cavallo - Politecnico di Milano, Università degli Studi dell'Insubria

12.00-12.10 *Integrated Environmental Authorization: odor monitoring with remotely piloted systems*
R.Borghesi, F.Mauro - ISPRA (Italian Institute for Environmental Protection and Research), Italian Ministry of Health

12.10-12.20 *IOMSartec system for continuous monitoring of odors in complex systems*
G.L. Pittoni, C.Dettori, M. Castellani, D.Carta - SARTEC Srl

12.20-12.30 *Acea Nos - IoT technology at the service of environmental monitoring*
F.Cammillozzi, M.Tesan, G.Varani, G.Cecchini, A.Filippi - Acea Spa (Italian multi-utility group)

12.30-12.40 *Preliminary results of the development of correlation algorithms between olfactometry and multiparametric systems*
L.de Gennaro, M.Cortese, A.Dipalma, A. Acquafredda, F.Dagostino, M.Amodio, F.La Forgia, P.Lagioia, G.Corsini, P.Morisco - Lenviros srl, AQP SpA

11.40-11.50 *Environmental Monitoring and Control*

12.40-12.50 *New frontiers in the use of IOMS as tools for process control and case studies*
C.Bax, S.Prudenza, B.J.Lotesoriere, L.Capelli - Polytechnic University of Milan

12.50-13.00 *End of life tires: how to dispose of them responsibly*
U. Mazzanti - CRF

13.00-13.20 **Poster Session**

AQ1 *Il problema delle maleodoranze nel comune di Marcianise (CE)*
G.Merola, P.Luongo, A.Danisi - ARPA Campania

AQ2 *Real time monitoring of natural VOCs emissions of vegetable compost, using SIFT-MS*
A.Carretta, M.Campo, A.Romani, T.Vona - SRA Instruments, PHYTOLAB, QuMAP Laboratory, Self-Garden srl

AQ3 *Stazione di monitoraggio intelligente per la valutazione della qualità dell'aria e degli odori*
G.Stani SRA Instruments

AQ4 *Sustainability of culture and culture of sustainability*
C.Lo Schiavo

13.20-13.30 Conclusions

Coastal areas and the climate change challenge – green ports, urban areas, coastal management and adaptation for a sustainable Blue Growth - SESSION WITH STREAMING IN ENGLISH LANGUAGE

Language: Italian
Simultaneous translation: English

Organized by: Ecomondo Scientific Technical Committee, Italian Ministry of Ecological Transition, ISPRA, TNEC Regions, GNRAC, LEGAMBIENTE

The great development of coastal areas in the last century gave a significant contribution to the economic and social well-being of entire regions and countries. Coastal systems, infrastructures, ports, urban areas, natural areas, are today at the heart of activities related to the sea economy, from marine-coastal tourism to fishing, from maritime transport to trade and the movement of people. But the concentration of settlements and human activities along coastal areas represents in the meantime a major concern today in relation to current climate change and the trend of sea level rise. In this context, in order to pursue the objectives of Blue Growth and seize as an opportunity the challenge of climate change, it is necessary to opportunely change development models, infrastructures design, transformation of coastal urban areas and waterfronts into a logic of adaptation and sustainability, capable on the one hand of contributing to the reduction of climate-altering factors and, on the other hand, to address the effects of climate change in the direction of enhancement of the resilience of coastal systems. The conference intends to give a contribution in shaping the picture of what is already under way in this area and with what perspectives.

Session Chairs

Roberto Montanari, Ecomondo Scientific Technical Committee
Edoardo Zanchini, Legambiente (Italian environmental association)
Massimo Gabellini, ISPRA (Italian Institute for Environmental Protection and Research)
Enzo Pranzini and Lorenzo Cappietti, University of Florence, GNRAC (National Research Group for Coastal Environment issues)

Programme

10.00 Institutional introduction

Ilaria Fontana, State Secretary at the Ministry of Ecological Transition with powers on hydrogeological risk, land use, protection of the marine environment and water resources (TBC)

Irene Priolo, Councilor for the Environment, Soil and Coastal Protection, Civil Protection, of the Emilia-Romagna Region.

10.30 S1 - Port facilities and "Green Ports": Energy and ecological transition, decarbonisation, sustainable sediment management

Chair: Edoardo Zanchini, Legambiente

1. The recovery plan and the policies for "Green Ports"
Giuseppe Catalano, mission unit coordinator by the Ministry of Sustainable Infrastructures and Mobility;
2. "Green Ports", the route for sustainable development
Cristiana Biondo, Legambiente (Italian environmental association);
3. Perspectives for the energy and ecological transition of large ports
Antonella Querci, Port System Authority of the Northern Tyrrhenian Sea;
4. The Envision Protocol for sustainable infrastructures: characteristics and applications
Lorenzo Orsenigo, President ICMQ;
5. Sustainable sediment management in the ports: application examples of the ejectors' technology.
Maurizio Siepi - Trevi SpA, Marco Pellegrini - Industrial Engineering Department, University of Bologna;

11.40 S2 - Urban coastal areas: risks and transformation opportunities risks and opportunities for transformation in terms of sustainability and adaptation

Chair: Massimo Gabellini, ISPRA; Roberto Montanari, Emilia-Romagna Region

1. Sea level along the Italian coasts in future climate scenarios
Gianmaria Sannino, Head of Climate Modelling and Impacts Laboratory, ENEA (Italian National Agency for New Technologies, Energy and Sustainable Economic Development);
2. Climate change impact indicators on coastal areas
Francesca Giordano, ISPRA (Italian Institute for Environmental Protection and Research);

3. Strategies in the Urbanistic Plans of the Emilia-Romagna coast for increasing resilience and adaptation to climate change, within the framework of the Regional Law 24/2017
Roberto Gabrielli, Laura Punzo, Graziella Guaragno - Department of Spatial and Urban Planning, Transports and Landscape, Emilia-Romagna Region;

4. The "Rimini Sea Park"
Anna Montini, University of Bologna, former Assessor of Environment Rimini Municipality;

5. Environmental observations and ecologic restoration in a regulated lagoon: the Venezia case study.
Caterina Dabalà CORILA.

13.15-14.30 Lunch break

14.30 S3 - Coastal management: Strategies and plans for coast adaptation, Mediterranean and international experiences

Chair: Enzo Pranzini, University of Florence, GNRAC

1. Ecosystem-based management and coastal adaptation, international experiences
*Stephen Olsen, Director Emeritus URI Coastal Resources Centre (Rhode Island); (*remote connection)*

2. Coastal Areas and management plans in river basins
Maurizio Ferla, Head of the National Centre for Coastal Protection - CNCOS, ISPRA (Italian Institute for Environmental Protection and Research);

3. The Coastal Plan of the Municipality of Lecce
Rita Miglietta, Assessor of Urban Planning Lecce Municipality;

4. The new ICZM Plan of the Marche Region in its first phase of implementation.
Luigi Ditoallevi e Giorgio Filomena, Marche Region;

5. Coastal adaptation plans according to the ICZM Protocol for the Mediterranean
Daria Povh, Croatia PAP/RAC;

15.40 S4 - Knowledge development: Experiences of interventions and of new methods and new technologies in survey activities on the coastal environment

Chair: Lorenzo Cappiotti, University of Florence, GNRAC

1. Multidisciplinary approaches to the analysis of coastal systems for a coordinated, cross-border management: challenges and results of the project CHANGE WE CARE.
Davide Bonaldo, CNR-ISMAR, for the CHANGE WE CARE Team

2. Integrated methodology in geognostic investigations for the coastal zone management.
Lorenzo Calabrese, Luisa Perini, SGSS Regione Emilia-Romagna - Annamaria Correggiari, Alessandro Remia, ISMAR-CNR

3. Activities of Tuscany Region for the protection of the coast: coastal monitoring and planning.
Gianfranco Boninsegni, Luigi Enrico Cipriani, Marco Masi, Enrica Mori - Regione Toscana

4. Reconstruction of the coastal dune in San Pietro a Mare, Valledoria Municipality.
Mario Deriu, Regione Sardegna

5. Integrated multibeam survey system and laser scanner on boat: characteristics and use in the management of the coastal environment even in the case of exceptional weather and sea events.
*Alessio Lanzone, Antonio Lucarelli - Drafinsub Survey Srl (*remote connection)*

**STATES GENERAL OF
THE GREEN ECONOMY***Event*

OPENING PLENARY SESSION: Ten years of green economy in Italy. The achievements and the strategic role towards 2030 - ITALIAN LANGUAGE VERSION

Language: Italian

Simultaneous translation: English

The tenth edition of the States General of the Green Economy takes place on the eve of COP26 on climate and coincides with the launch of the National Recovery and Resilience Plan, and, more broadly, with the measures to relaunch the economy after the recession due to the pandemic. The green economy is the driving force of such recovery, which specifically aims to a Green Deal based on a circular and decarbonized economy, able to face the climate crisis and to promote a quality, long-lasting, and resilient development.

The next decade will be crucial to achieve climate neutrality, facing demanding changes in all sectors: energy, industry, transport, agriculture, construction, services.

The progresses of the green economy in Italy over the last decade show that we have the capacity and the potential to turn the challenges of the next decade into opportunities for development, investments, and employment.

The ecological transition and the digitalization should be addressed with an integrated approach. The ecological transition requires demanding measures and adequate resources: it is a unique opportunity what can turn into a great opportunity, to be managed with adequate measures and consistency.

2021 Report on the state of the green economy with a focus on Digitalization for the ecological transition

WELCOME REMARKS:

Lorenzo Cagnoni, President of Italian Exhibition Group

OPENING:

Irene Priolo, Region Councillor for Environment, Emilia-Romagna Region

INTRODUCTION:

Edo Ronchi, National Council for the Green Economy

DISCUSSIONS:

Simona Bonafé, Member of the European Parliament, Vicepresident S&D group
"Fit for 55": the European roadmap and the implementation package

Laura Cozzi, Chief Energy Modeller, International Energy Agency
Global energy scenarios in the World Energy Outlook 2021

CONCLUSIONS:

Roberto Cingolani, Minister for the ecological transition

**WASTE MANAGEMENT
AND VALORIZATION***Ecomondo Event***Waste management plants and environmental sustainability: fake news and cognitive bias**

Language: Italian

Organized by: Ecomondo Scientific Technical Committee and FISE ASSOAMBIENTE

Communication plays a fundamental role in the relationship between local contexts and the realization of the waste management plants and infrastructures necessary to ensure the collective well-being, or the desire for a general improvement of the service. Effective communication can help citizens to reinterpret reality with greater rationality and awareness, while bad or distorted information is often at the root of misperceptions on the part of citizens-users, also in the field of local public services and specifically in waste management. Considered the importance of the waste management service, recognized as essential public service, how can communication credibility be achieved? What can be the determining elements at the basis of a communication process consistent with the desire to build and maintain trust?

The BlueMed Pilot healthy plastics-free Mediterranean sea towards the 2030 targets: the strategy developed by the plastic producing and transforming operators of the area - ENGLISH LANGUAGE SESSION

Language: English
Simultaneous translation: Italian

Organized by: Ecomondo Scientific Technical Committee, BlueMed GSOs, Federchimica-PlasticsEurope Italia; National Research Council of Italy (CNR)

EU Missions are undertaking actions to face some of the greatest global challenges by setting 2030 targets that includes cleaning marine waters, restoring degraded ecosystems and habitats, decarbonising the blue economy. In the frame of the BlueMed Pilot Action on a Healthy Plastic-free Mediterranean Sea, the wide community of the plastic producing and transforming operators of the area agreed on the urgency to reduce the risk for the environment and human health posed by plastic pollution by developing and implementing a shared vision for plastic in the circular economy. This event, jointly organized by the Euro-Mediterranean Group of 16 Senior Officials of BlueMed Initiative (www.blued-med-initiative.eu) and Federchimica-PlasticsEurope Italia, looks at the solutions adopted for a smarter local use, management and recycling of plastics with a high impact in terms of replication trough the basin and among international governance structures. Object of discussion includes key challenges ensuring a healthy and productive Sea together with the identification of pathways that need to be implemented to obtain measurable results and meet the 2030 targets for a systemic change.

Section chairs

Mario Ceribelli, PlasticsEurope Italia

Sigi Gruber, European Commission

Fabio Trincardi, National Research Council of Italy (CNR)

Programme

14.00 Introduction by the Chairs

14.10 *The Mission: challenges and opportunities for a systemic change*

Elisabetta Balzi, EC - DG RTD - BlueMed GSO Working Group delegate

14.30-14.50 Research and innovation in the recovery and resilience plans: key investments at National and Regional level

Ilde Gaudiello, DG Circular Economy, Ministry of the Ecological Transition, MiTE (TBC)

14.50-15.00 *The BlueMed Pilot: main achievements*

Fabio Fava, University of Bologna, Italian BlueMed GSO Working Group delegate

15.00-16.20 *Introducing key priorities for the Mediterranean Plastic Industry*

Mario Ceribelli, PlasticsEurope Italia

Roundtable: How are good practices put into practice?

PlasticsEurope's Network of Mediterranean associations and policy makers:

AHPI (Association of Hellenic Plastic Industries); Aspaplast (Romanian Plastics Processor Employers' Association); BAP (Bulgarian Association Polymers); HGK (Croatian Chamber of Commerce); PAGEV (Turkish Plastic Industry Foundation); Legambiente (for Life Blue Lakes).

16.20-16.30 *Greening the MED: the role of Ports and Fisheries*

Mario Dogliani, SDG4MED

16.30 Coffee break

16.50-17.00 *From research to solutions: the innovative ecosystem of marine pollution*

Hanna Dijkstra, IVM – Institute for Environmental Studies, Vrije Universiteit

Successful large-scale applications of systemic planning, risk-assessment and safety planning in water use and reuse (including climate change and biodiversity)

Language: Italian

Organized by: Ecomondo Scientific Technical Committee, University of Bologna, Polytechnic University of Marche, UTILITALIA and Italian Institute of Health, PRIMA FIT4REUSE, H2020 Digital Water City, H2020 ULTIMATE, H2020 HYDROUSA

CALL FOR PAPERS

The Sustainable Development Goals on water, energy, food and biodiversity sit at the heart of the Agenda 2030. Higher sustainability and circularity of water management call for systemic cross-sectoral collaboration and risk-based approach. Water-Energy-Food-Ecosystem nexus should drive decisions to overcome the current silo-driven disproportionate use. From regional planning to practical case studies the workshop will address those issues focusing on large-scale planning of sustainable and safe water use and reuse, including digital systems for monitoring and real data analysis, early warning and decision support systems and risk management plans for water reuse for irrigation. The nexus between water treatment and reuse, energy and environmental footprint, sustainable agricultural production and climate change will also be taken into consideration.

Section Chairs

Attilio Toscano, University of Bologna, Ecomondo Scientific Technical Committee
Lucia Bonadonna, Italian Higher Institute of Health
Francesco Fatone, Marche Polytechnic University, Ecomondo Scientific Technical Committee

Programme

14.00 Introduction by the Chairs

14.05-14.20 *Current status for the development of the guidance on Water Reuse Regulation*
Roberta Maffettone, European Commission – JRC

14.20-14.35 *Planning and innovation projects for agricultural water reuse in Emilia-Romagna*
Attilio Toscano, University of Bologna and PRIMA FIT4REUSE Consortium

14.35-14.50 *A nation-wide study on wastewater treatment and reuse potential in Italy: challenges and possibilities*
Elena Mauro UTILITALIA, Alessandro Di Martino Wastewater commission Coordinator of UTILITALIA (Italian federation of energy, water and environmental services)

14.50-15.05 *Sanitation safety planning and WEFE nexus assessment for water reuse in urban and peri-urban irrigation of Rome and Milano*
Luca Lucentini and Susanna Murtas, Italian Higher Institute of Health and H2020 DWC Consortium

15.05-15.15 Q&A and panel discussion

15.15-15.30 *From territorial carbon footprint to water reuse and WEFE nexus: regional case studies*
Francesco Fatone, Marche Polytechnic University and Emilio Caporossi, Gruppo HERA

15.30-15.45 *The role of High Performance Computing and open climate data for climate-proofing water and natural resources management*
Gabiella Scipione, CINECA and CEF Highlander project

15.45-16.00 *Strategies of the irrigation consortia for a sustainable and smart irrigation water use and reuse within the new EU policies*
Adriano Battilani, ANBI (National association of consortia for the management and protection of the territory and irrigation water)

16.00-16.15 *Systemic irrigation planning in Italy through integrated computer modeling and monitoring*
Claudio Gandolfi, University of Milano

16.15-16.30 *Microplastic pollution in large lakes and associated urban water infrastructures: mid-term results of EU LIFE BLUE LAKES*
Elisa Scocchera, LEGAMBIENTE (italian environmental association)

16.30-17.25 Presentations selected from the Call for Papers

16.30-16.45 *Digital Twin for Water Management in Smart Agriculture*
Mark Carvalho, Digital Twin Consortium, Co-founder, The Green Alliance International

16.45-16.55 *Numerical Modelling in Acea – From planning to management through innovation*
J. Eusepi, G. Cecchini, A. Filippi, ACEA Elabori SpA

The BlueMed Pilot healthy plastics-free Mediterranean sea towards the 2030 targets: the strategy developed by the plastic producing and transforming operators of the area - SESSION WITH STREAMING IN ITALIAN LANGUAGE

Language: English

Simultaneous translation: Italian

Organized by: Ecomondo Scientific Technical Committee, BlueMed GSOs, Federchimica-PlasticsEurope Italia; National Research Council of Italy (CNR)

EU Missions are undertaking actions to face some of the greatest global challenges by setting 2030 targets that includes cleaning marine waters, restoring degraded ecosystems and habitats, decarbonising the blue economy. In the frame of the BlueMed Pilot Action on a Healthy Plastic-free Mediterranean Sea, the wide community of the plastic producing and transforming operators of the area agreed on the urgency to reduce the risk for the environment and human health posed by plastic pollution by developing and implementing a shared vision for plastic in the circular economy. This event, jointly organized by the Euro-Mediterranean Group of 16 Senior Officials of BlueMed Initiative (www.blued-med-initiative.eu) and Federchimica-PlasticsEurope Italia, looks at the solutions adopted for a smarter local use, management and recycling of plastics with a high impact in terms of replication trough the basin and among international governance structures. Object of discussion includes key challenges ensuring a healthy and productive Sea together with the identification of pathways that need to be implemented to obtain measurable results and meet the 2030 targets for a systemic change.

Section chairs

Mario Ceribelli, PlasticsEurope Italia

Sigi Gruber, European Commission

Fabio Trincardi, National Research Council of Italy (CNR)

Programme

14.00 Introduction by the Chairs

14.10 *The Mission: challenges and opportunities for a systemic change*

Elisabetta Balzi, EC - DG RTD - BlueMed GSO Working Group delegate

14.30-14.50 Research and innovation in the recovery and resilience plans: key investments at National and Regional level

Ilde Gaudiello, DG Circular Economy, Ministry of the Ecological Transition, MiTE (TBC)

14.50-15.00 *The BlueMed Pilot: main achievements*

Fabio Fava, University of Bologna, Italian BlueMed GSO Working Group delegate

15.00-16.20 *Introducing key priorities for the Mediterranean Plastic Industry*

Mario Ceribelli, PlasticsEurope Italia

Roundtable: How are good practices put into practice?

PlasticsEurope's Network of Mediterranean associations and policy makers:

AHPI (Association of Hellenic Plastic Industries); Aspaplast (Romanian Plastics Processor Employers' Association); BAP (Bulgarian Association Polymers); HGK (Croatian Chamber of Commerce); PAGEV (Turkish Plastic Industry Foundation); Legambiente (for Life Blue Lakes).

16.20-16.30 *Greening the MED: the role of Ports and Fisheries*

Mario Dogliani, SDG4MED

16.30 Coffee break

16.50-17.00 *From research to solutions: the innovative ecosystem of marine pollution*

Hanna Dijkstra, IVM – Institute for Environmental Studies, Vrije Universiteit

17.00-17.35 Many languages, one voice: the BlueMed Hackathon to engage the community of young innovators and to boost investments in the blue economy

Fedra Francocci, CNR-IAS (Institute for the study of anthropogenic impacts and sustainability in the marine environment)

Roundtable with:

- Luca Ballista, Facility Live – The innovation ecosystem of the Mediterranean makes flourish ideas into business
- The BlueMed Hackathon Winning Teams - *Pitch Presentations*
Team 2: Inès Boujmil, Ilaria Bellomo, Aziz ben Ghedifa, Ghazy Boujmil;
Team 3: Inés González, Valeria Zeppellini;

Indoor air quality is increasingly a challenge for health: what needs to change, how and when

Language: Italian

Organized by: Ecomondo Scientific Technical Committee and Higher Institute of Health**CALL FOR PAPERS**

There is a lot of talk about indoor air quality, its principles and its role of health prevention and on several occasions. Undoubtedly it represents in this "historical phase" a fundamental issue for its economic implications (see the various bonuses eg eco-bonus 110%), environmental (reduction of polluting emissions for heating / cooling eg community directives and international COP agreements) and health related to the management of indoor environments during the COVID-19 pandemic). The day aims to shed light on the aforementioned implications and illustrate some examples and case studies. Furthermore, with regard to the approved National Prevention Plan (PNP) 2020-2025, draw attention to the objectives contained in order to try to pursue and substantially reduce the exposure of the population.

European targets of climate neutrality: policies and resources for a competitive and sustainable agrifood supply chain

Language: Italian

Organized by: Ecomondo Scientific Technical Committee and Confagricoltura, Federalimentare, Enea

CALL FOR PAPERS

The European Union has presented an overall action plan to implement the objectives of the Green Deal and aims to achieve climate neutrality by 2050. The reduction of the environmental impact is fixing for all the actors of the agrifood supply chain objectives and challenges to which it will be not easy to respond. These include the reduction of greenhouse gas emissions, the promotion of energy efficiency and innovative technologies with low CO₂ emissions (the so-called decarbonisation). In addition, the Member States are also outlining national strategies that identify possible paths to reach a condition of "climate neutrality", in which residual greenhouse gas emissions will be offset by the absorption/capture of CO₂ and by the possible use of forms of geological storage as well as CO₂ reuse. The realization of these objectives cannot be separated from the support from the European and national authorities through financing and facilitating measures that can really support the necessary investments requested to the operators of the agrifood supply chain.

Section chairs

Donato Rotundo, Confagricoltura - General Confederation of Italian Agriculture

Maurizio Notarfonso, Federalimentare - Italian Food & Drink Industry Federation

Massimo Iannetta, Enea - Italian National Agency for New Technologies, Energy and Sustainable Economic Development

Programme

14.00-14.20 Welcome and opening speech: *The decarbonisation in the agrifood supply chain*
Massimo Iannetta, Enea

14.20-14.40 Christian Holzleitner, Head of Unit, DG CLIMA - Unit C3 – Land Use and Finance for Innovation

14.40-15.10 Giuseppe Blasi, Italian Ministry of Agricultural, Food and Forestry Policies

15.10-15.30 Andrea Tilche, Representative of the Italian Ministry for the Ecological Transition

15.30-16.30 Business case study

Giuseppe Pulina, University of Sassari

Michele Pisante, University of Teramo

Competitive and Sustainable agricultural and food industry supply chains

16.30-17.00 Half an hour with: interview to Mr. Massimiliano Giansanti (President of Confagricoltura) and to Mr. Ivano Vacondio (President of Federalimentare)

"Net-zero": how to achieve it?

Language: Italian

Organized by: Ecomondo Scientific Technical Committee and ItaSIF, in collaboration with WWF and Eurosif

An increasing number of companies and investors are openly committing to cut their emissions by 2050 reaching "net zero" targets. The achievement of this goal is necessary to align the economy to the EU Green Deal and Paris Agreement scenarios. Now, the main challenge is to create effective strategies and set realistic and measurable intermediate targets.

Which are the tools and strategies that financial actors can use to contribute to climate change mitigation by aligning investment and financing policies to net-zero targets?

The Italian Sustainable Investment Forum (ItaSIF) organized an in-depth path for its members aimed at: 1) creating an opportunity to discuss and share experiences and good practices; 2) identifying strategies and concrete actions to align investment portfolios to net-zero targets.

At the end it has been produced a position paper, to be presented within the event, with the aim to provide concrete guidelines to investors willing to integrate the "net-zero" targets into their investment policies.

Section Chair

Francesco Bicciato, Secretary General, ItaSIF - Italian Sustainable Investment Forum

Programme

14.30-14.35 Introduction by the Chair

14.35-14.45 *Sustainable finance to the "net-zero" test: Presentation of the paper*

Arianna Lovera, Senior Programme Officer, ItaSIF - Italian Sustainable Investment Forum

14.45-15.10 *Keynote speech*

Marco Dri, Climate change Specialist, European Investment Bank

15.10-16.10 *Roundtable: How to make the "net-zero" goal concrete and achievable?*

The role of the national waste management program in the ecological transition

Language: Italian

Organized by: Ecomondo Scientific Technical Committee and Utilitalia

The achievement of national target on waste management has always come to terms with a waste planning declined at a regional level and with the difficulty in intervening – in a timely and effective manner – where delays encountered at the regional level risk jeopardizing the achievement of national targets. The national decree 116/2020, in addition to adopting recycling and reduction objectives of landfilling of municipal waste (to be achieved by 2035), introduced a new important tool: the National Waste Management Program (NWMP). Through the comparison between the main institutions involved in the definition and implementation of the NWMP, the environmental associations and the operators of waste management, the conference will try to analyze the potential of this tool. Methodological proposals will also be put forward to make the most of a fundamental opportunity to definitively overcome the structural criticalities that characterize the national waste management system, and promote the industrial development of the sector, only through which will be possible a transition to a circular and sustainable economy.

The contribution of geotechnical engineering for solving environmental problems

Language: Italian

Organized by: Ecomondo Scientific-Technical Committee & Italian Geotechnical Society

In the context of environmental issues such as contaminated sites, landfills or waste materials, geotechnical engineering skills play an essential role in the design and construction of waste disposal by landfills, remediation technologies and reuse of waste materials. The first part of the conference is dedicated to some of the peculiar analyses required for the correct design of landfills and remediation of polluted sites, such as the analysis of contaminant migration, geotechnical stability, and health-environmental risk. The second part concerns the performance of different materials involved in the field of geo-environmental engineering (e.g. barrier materials, reactive materials, dredged sediments, soils from excavations), to highlight their advantages, limits and correct use or treatment, in the light of the most recent scientific developments and application experiences.

Programme

9.30 -10.00 Registration

10.00-10.15 Opening address

Nicola Moraci (IGS - Italian Geotechnical Society President)

Daniele Cazzuffi (IGS - Italian Geotechnical Society President)

Session 1 Analysis

Chair: Nicola Moraci, IGS

10.15-10.45 General introduction

Erio Pasqualini – Polytechnic University of Marche, Ancona

10.45-11.15 Migration of contaminants in low permeability barriers

Andrea Dominijanni, Polytechnic of Turin

11.15-11.45 Stability analysis in landfills: specific aspects

Ivo Bellezza, Polytechnic University of Marche, Ancona

11.45-12.15 Interface parameters for landfill barrier revetments

Paolo Carrubba, Paolo Pavanello, University of Padua

12.15-12.45 Risk analysis for contaminated sites

Marta Di Sante, Polytechnic University of Marche, Ancona

12.45–13.00 Discussion

Session 2. Materials and related applications

Chair: Daniele Cazzuffi, IGS

14.00-14.15 Introduction

14.15-14.45 Geosynthetic clay layers for capping systems

Francesco Mazzieri, Polytechnic University of Marche, Ancona

14.45-15.15 Cement-bentonite mixes for diaphragm walls

Evelina Fratolocchi, Polytechnic University of Marche, Ancona

15.15-15.45 Reactive permeable barriers to reduce groundwater contamination

Stefania Bilardi, Nicola Moraci, Mediterranean University of Reggio Calabria

15.45-16.15 Environmental protection and remediation of polluted sites with active geocomposites

Alberto Simini, Huesker, Trieste

16.15-16.45 Consolidation of dredged sediments in port area

Mirko Felici, Polytechnic University of Marche, Ancona

16.45-17.30 Discussion and Closure

Daniele Cazzuffi (CESI SpA, Milano)

10:00 - 11:00

Closing the loop: tools and actions for boosting the secondary raw materials - ITALIAN LANGUAGE VERSION

Language: Italian

Simultaneous translation: English

Organized by: Ecomondo Scientific Technical Committee and Utilitalia

Good separate collection (in quantitative and qualitative terms) and an adequate capacity of recycling, recovery and disposal facilities, are absolutely necessary but not sufficient conditions to close the waste management cycle. The "loop" can only be closed with the return into the production cycles of the material and energy resources present in the waste. Without adequate demand for secondary raw materials and products obtained from waste recovery, the transition to the circular economy risks not being completed, compromising the great transformation effort of the national industry. The conference aims to illustrate and discuss with some of the main European and national players, innovative proposals to support the demand for secondary raw materials and products obtained from waste recovery, through the adoption of incentive economic tools and measures.

Section chair

Alberto Ferro, Coordinator of the Separate collection and recycling of municipal waste Commission of UTILITALIA (Italian federation of energy, water and environmental services)

Program

10.00 Introduction and coordination by the Chairman

Alberto Ferro, Coordinator of the Separate collection and recycling of municipal waste Commission of Utilitalia

The perspective of waste management companies

Pietro Antonio D'Alema, General Director Silea S.p.A.

Ennio Scridel, CEO Metal Recycling Venice

Tools and enabling measures: examples and proposals

Francesca Mazzarella, Utilitalia Foundation

Donato Berardi, REF Ricerche

Sara Corrado, Researcher of ENEA (Italian National Agency for New Technologies, Energy and Sustainable Economic Development)

Luca Barberis, Head of Energy Efficiency and Sustainable Development Divisions, GSE (Italian Energy Services Managing Authority)

The European Commission point of view

Mattia Pellegrini, Head of Unit DG-ENVI European Commission

12.15 Round Table

Moderator: Alberto Ferro, Coordinator of the Separate collection and recycling of municipal waste Commission of UTILITALIA

Luca Mariotto, Director of Environmental Sector of Utilitalia

Paolo Barberi, President of UNICIRCULAR (Circular Economy Companies Union)

Ilde Gaudiello, Director of Divisions III e IV, Directorate General for the Circular Economy, Italian Ministry for Ecological Transition

Luca Ruini, President of CONAI (National Packaging Consortium)

13.00 Conclusions

Filippo Brandolini, Vice President of Utilitalia (Italian federation of energy, water and environmental services)

10:00 - 13:00

CONFERENCES**
Ecomondo Event**European Horizon2020 systemic actions for water-smart circular cities, regions and industries - SESSION WITH STREAMING IN ITALIAN LANGUAGE**Language: English
Simultaneous translation: Italian**Organized by: Ecomondo Scientific Technical Committee (CTS) and Water Europe**

Water is transversal in systemic strategies for circular transition and sustainable development of cities, regions, industries and communities. Green, grey and digital solutions, combined with proper governance and business approaches are being developed in Horizon2020 Innovation Actions and can make a crucial socio-economic impact towards the Green Deal objectives. This workshop will bring together major local and territorial innovative case studies and deliver a platform of experience to promote living lab approaches.

Section Chairs

Evdokia Achilleos, European Commission – European Research Executive Agency – Head of Sector B3.002 - Green Europe - Biodiversity, Circular Economy and Environment
Andrea Rubini, Ecomondo's Scientific Technical Committee and Water Europe
Francesco Fatone, Ecomondo's Scientific Technical Committee and Marche Polytechnic University

Programme

10.00-10.30 *Water in Horizon 2020, Horizon Europe and National Initiatives: lessons learnt, aligning programs and synergizing efforts*

Focus on Horizon Europe - Evdokia Achilleos, European Commission
Focus on Water JPI - Giuseppina Monacelli, Chair Water JPI
Focus on Water4All - Maria Chiara Sole, Italian representative in Water4All, ISPRA

BUILDING ON RESULTS OF ONGOING PROJECTS:

10.30-11.00 *Digital Transition in Water-Smart Cities: Digital-Water City*
Chair Nicolas Caradot, Berlin Competence for Water, Germany – Project Coordinator

Contributions from case studies:

MILANO - Play with serious game and matchmaking tool
Marco Bernardi, Claudio Gandolfi, Serena Radini, Enrico Marinelli and Adriano Mancini – Gruppo CAP, UNIMI and UNIVPM

PARIS - SIAAP - Demo of Early Warning System for bathing water
Sofia Housni, Sanitation for Greater Paris SIAAP

11.05-11.20 *Circular integration of regional wastewater and waste management services: BBI CIRCULAR BIOCARBON flagship*
Natalia Alfaro Borjabad URBASER, Spain – Project Coordinator

11.20-11.30 Break

11.30-12.05 *Circular Transition in small and decentralized communities: HYDROUSA*

Boosting SME investments for a blue and green economy - ENGLISH
LANGUAGE SESSION

Language: English

Organized by: Ecomondo Scientific Technical Committee and CINEA (Sustainable Blue Economy Unit)

The event will launch the newly started SME-grants funded by the European Maritime and Fisheries Fund (EMFF). The new set of projects is featuring sustainable blue economy sectors including algae and aquaculture, green transport and offshore renewable energy, and data and underwater technology. The projects will shortly present their concept, products and expected impacts in relation to the EU Green Deal, circular economy, and digitalization, a Q&A session will allow participants to interact with the project coordinators and speakers.

Session Chairs

Luca Marangoni, Deputy Head of Unit, European Climate, Infrastructure and Environment Executive Agency (CINEA)

Programme

10.00-10.10 Introduction by the Chair

10.10-10.25 **Setting the Scene For Blue Economy SMEs**

Policy context – EMFF SME grants for the sustainable blue economy

Felix Leinemann, Head of Unit, Blue Economy Sectors, Aquaculture and Maritime Spatial Planning, Directorate-General for Maritime Affairs and Fisheries, European Commission

BLUEINVEST Platform

Daniela Cedola, Consulting Director, PwC

10.25-12.45 **Thematic sessions to give the projects the possibility to shortly present their projects**

10.25-11.10 **Blue bioeconomy, algae and aquaculture**

ULVAFARM: Large scale sea cultivation of green seaweed
Simon Johansson, Nordic Seafarm, Sweden

KELP-EU: An innovative, sector-leading seaweed biorefinery - enabling the European blue circular economy
Charles Bavington, OCEANIUM, UK

ALGAENAUTS: Eco-friendly and sustainable new family of biopesticides based on microalgae via circular economy approach
Joaquin Pozo Dengra, BIORIZON BIOTECH, Spain

SEAFOODALGTERNATIVE: Fish substitute from algae to preserve marine wildlife and develop algaculture
Jean-Paul Cadoret and Allyn Severien, ALGAMA, France

AQUAPEKILO: Replacing soy with Pekilo protein in aquafeed
Joosu Kuivanen, ENIFERBIO, Finland

Questions and Answers

11.10-11.20 Coffee break

11.20 **Decarbonisation and digital ocean: green transport and offshore renewable energy**

WINNEW: The new wind propulsion technology to lead the shipping industry's shift towards a blue economy
Karim Eido and Giorgio Provinciali, AYRO, France

SEAWING4BLUE: The automated wing to power ships, providing 20% of fuel savings and emissions reduction
François-Louis Graeve, AIRSEAS, France

TECOW: Transition to Emission-free Commuting on Waterways
Fredrik Thornell, Green City Ferries, Sweden

ESENSE: breakthrough electromagnetics detection, navigation and characterization
Gary Bagot and Pierre Tuffigo, ELWAVE, France

CO2CONTROL: collaborative platform for shipping container operations to take control of CO2 emissions by route optimisation
Pierre Garreau and Geoffroy Willaume

Questions and Answers

12.20-13.00 Q&As

13.00 Closure (by the chairs)

Language: Italian

Organized by: Ecomondo Scientific Technical Committee and CIC - Italian Composting and Biogas Association, ISPRA - Italian Institute for Environmental Protection and Research, ECN - European Compost Network

The plenary session will review the collection and recycling of organic waste in Europe and Italy. The topic of PNRR, the National Recovery and Resilience Program, will also be addressed, in light of the evolution of the sector and of the expenditure items "open to the sector" at the government level. In addition, a few weeks after the approval of MTR2 by Arera, the issue of regulation will be addressed with the related opportunities and / or criticalities of a system that changes the rules of organic recycling.

Session Chair

Flavio Bizzoni, Chair of CIC - Italian Composting and Biogas Association

Programme

10.00-10.10 Opening session

Flavio Bizzoni, Chair of CIC

10.10-10.30 *The state of the art of Biowaste in Europa, the action of European Compost Network (ECN)*

Stefanie Siebert, ECN Director

10.30-10.50 *The circular economy of the Biowaste between Recovery and Resilience*

Massimo Centemero, CIC

10.50-11.10 *The italian biowaste sector referred to european target*

Andrea Lanz, ISPRA

Italian Recovery Plan and blue circular economy - SESSION WITH STREAMING IN ENGLISH SESSION

Language: Italian
Simultaneous translation: English**Organized by: Ecomondo Scientific Technical Committee, CNR, Italian Ministry of Economic Development, Cluster BIG**

The Conference aims to continue from previous Ecomondo's Editions the discussion on the challenges and opportunities of circular economy in several sectors of sea economy. Circularity principles at the base of the Circular Economy Package are very relevant in the context of the EU Green Deal, as they must be reflected in national strategies (e.g. BIT II - A new Bioeconomy strategy for a sustainable Italy; Italian Recovery Plan (PNRR - Piano Nazionale di Ripresa e Resilienza)). Following some keynote presentations on key trajectories of national and Mediterranean relevance, a series of pitches from science, academia, decision makers, private operators will showcase best practices and experiences in different sectors.

Section Chairs

Andrea Barbanti, National Research Council (CNR)
Roberto Cimino, Cluster BIG (Blue Italian Growth) and ENI
Maria Grazia Verdura, Italian Ministry of Economic Development

Programme

10.00 Introduction by the Chairs

10.10-11.25 **Session 1**

Blue Circular Economy and PNRR: actions and interactions
Giovanni Caprino, Cluster BIG and CETENA (center for naval engineering studies)

Reinassance Flagship Project
Gian Marco Luna, CNR-IRBIM (The Institute for Marine Biological Resources and Biotechnology of the National Research Council) and IT National Bioeconomy Coordination Board

Challenges and potentials of blue biotechnologies
Giovanna Romano, SZN, MUR-ITEM Project and WG BIG on Bioeconomy

Building the Mediterranean blue bioeconomy community: MED-PANORAMED Strategic Projects B-BLUE and BLUEBIOMED
Cristian Chiavetta (ENEA - Italian National Agency for New Technologies, Energy and Sustainable Economic Development) and Stefano Valentini (ART-ER Attractiveness Research Territory" Emilia-Romagna Joint Stock Consortium)

Critical raw materials in blue economy
Claudia Brunori, ENEA - Italian National Agency for New Technologies, Energy and Sustainable Economic Development

11.25-11.35 Q&A

11.35-11.50 Coffee break

11.50-13.15 **Session 2**

Offshore platforms sustainable retrofitting: a contribution to a circular blue economy
Antonio Dell'Anno, Marche Polytechnic University

Circularity of a safe and sustainable decommissioning and reuse of offshore Platform: results from CLYPEA researches
Ilaria Antoncicchi, Italian Ministry of Economic Development and Clypea Network

Holistic Life Cycle Analysis (LCA) Platform for the Shipping Industry
Marc Bonazountas, Epsilon Malta, Ltd, Project EMFF-EASME VesselsLife.com

Marine Litter: turning a problem into a resource - the marGnet and MAELSTROM projects
Fantina Madricardo, CNR-ISMAR (Institute of Marine Sciences - National Research Council)

Recover Ingredients: from bones and shells to cosmetic ingredients and plant fertilizers
Alessio Adamiano, Recover Ingredients s.p.a. and CNR-ISTEC (Institute of science and technology for ceramics - National Research Council)

Best practices of circularity in aquaculture
Michela Cariglia, Consorzio Gargano Pesca

The contribution and potential of Industrial Symbiosis for the ecological transition

Language: Italian

Organized by: Ecomondo Scientific Technical Committee, ENEA and SUN (Symbiosis Users Network)

CALL FOR PAPERS

The ecological transition placed at the center of the Italian government agenda requires the redesign of production processes, distribution systems and consumption models. In this context, it is essential that the country-system is able to promote and encourage methodological and technological innovation through the systemic implementation of industrial symbiosis along the value chain and among value chains. The event aims to be an opportunity to discuss concrete cases of industrial symbiosis (with details of the operational, procedural, economic and environmental aspects, also with reference to the potential for decarbonisation), on technical and / or operational standards and on the tools to support both implementation and investments for industrial symbiosis.

Section Chairs

Laura Cutaia, ENEA (Italian National Agency for New Technologies, Energy and Sustainable Economic Development) – SUN (Symbiosis Users Network) President
Giacomo Vigna, Circular Economy and Ecosustainable Development Policies Division, Ministry of Economic Development

Program

10.00-10.10 Introduction

10.10-11.00 Invited speakers

Laura D'Aprile, Head of the Department for Ecological Transition and Green Investments - Ministry for Ecological Transition

Paola Migliorini, Deputy Head of Unit, European Commission, DG Environment, Sustainable Production, Products and Consumption

Marco Conte, Deputy Secretary General of the Circular Economy and Environment Area - Unioncamere (Italian Union of Chambers of Commerce, Industry, Handicrafts and Agriculture)

Marco Ravazzolo, Responsible for Environment and Energy - Industrial policies and sustainability area - Confindustria (General Confederation of Italian Industry)

Enrica Maria Martino, Projects and Tools Area, Infrastructure and Environment Office - Territorial Cohesion Agency

11.00-12.20 Presentations from Call for papers

What prevents the adoption of large-scale industrial symbiosis in Italy?

Luca Fraccascia, University of Rome "La Sapienza"

The symbiosis between water service and waste management

Alessandro Reginato, CAP Group

Industrial symbiosis techniques applied to the waste management of the Sicilian olive growing chain

Rosaria Raciti, University of Catania

Cartoneco, the Ecologically Equipped Production Area that gives life to cardboard

APEA CARTONECO - "Green Lazio Region"

The industrial symbiosis activities within the CREIAMO project. Preliminary results

Emanuela De Marco, ENEA (Italian National Agency for New Technologies, Energy and Sustainable Economic Development)

Available tools and methodologies for the sustainability assessment in production

Davide Don, Fraunhofer Italia IEC

How digitalization can foster collaborative processes for waste management with a view to circular economy

Simone Grasso, CYRKL Zdrojova platforma

Blockchain technology to drive industrial symbiosis within circular supply chain management

Valentina Ventura, University of Bologna

12.20-12.50 **Pitch – Case studies**

4.0 Industry Technologies and Industrial Symbiosis: state of the art and recent developments

Sara Pelusi, University of Chieti-Pescara "G. d'Annunzio"

The industrial eco-district: a new organizational model

Giancarlo Longhi, Smart City Group

Hydrogen for the transition of the process industry

Barbara Valenzano, Puglia Region

The Biosphere and Saturn projects - two examples of material recovery

Paola Zitella, Environment Park

White slag from electric furnace steel mills: new uses and perspectives

Paolo Plescia, Resilco

PoplyHouse. The poplar plywood constructions

Lorena Alessio, LorenaAlessioArchitetti

Recovery of carbon fiber

Emanuel Zamagni, Gruppo Hera

The European Green Deal: first results and new approaches. A view from H2020 to Horizon Europe - SESSION WITH STREAMING IN ITALIAN LANGUAGE

Language: English
Simultaneous translation: Italian

Organized by: Ecomondo Scientific Technical Committee and APRE – Agency for the Promotion of European Research

The European Green Deal is the European Commission's roadmap to make Europe the first climate neutral continent by 2050. To reach this goal, action is required by all fields of the EU economy, including decarbonizing the energy sector, investing in environmental-friendly technologies, cooperating with international partners to improve global environmental standards, and so on.

For the last and biggest call under Horizon2020 – known as European Green Deal call – the EC tabled €1 billion for an ambitious action plan, designed to respond to the climate change crisis by providing more protection to Europe's biodiversity and habitats, accelerating a sustainable recovery. For a systemic transformation towards a climate-neutral EU, the call included 8 thematic areas, reflecting the key workstreams of the Green Deal, and 2 horizontal priorities, strengthening knowledge and empowering citizens. The holistic approach that underpins the Green Deal call and the whole H2020 Programme, will be boosted in the new R&I Funding Programme until 2027, known as Horizon Europe. Such approach can be found in Horizon Europe Work Programme and mainly in the Clusters (green technologies for cultural heritage in CL2; climate-related disasters in CL3; green manufacturing and production, digital and emerging technologies and space applications in CL4, exc.). Among all, Cluster 5 and Cluster 6 are those that most reflects the objectives of the Green Deal – which will have a thematic approach focused respectively on "Climate, energy and mobility", and "Food, Bioeconomy, Natural Resources, Agriculture and Environment". The workshop will investigate the first results coming from the Horizon 2020 Green Deal call in a long term prospective toward Horizon Europe.

Papers***The Health Impact Assessment (HIA): analysis of the application of the ISS National Guidelines in EIA procedures**

Language: Italian

Organized by: Ecomondo Scientific Technical Committee and Higher Institute of Health**CALL FOR PAPERS**

The conference (workshop) aims to describe the application, in different regions, of the HIA guidelines drawn up by the Italian National Health Institute (ISS) implemented for specific industrial settlements, in order to include and assess the health impacts during the EIA procedures, and, in the near future, of applying the HIA approach. The conference (workshop) also describes the activities of the biennial project funded by the Ministry of Health, aimed primarily at training activities for the personnel of the regional health prevention departments in charge of carrying out these assessments for the industrial plants located in their area. The different experiences and activities of territories in order to develop fruitful collaborations for HIA studies will be discussed.

Section Chairs

Italian Recovery Plan and blue circular economy - ITALIAN LANGUAGE SESSION

Language: Italian
Simultaneous translation: English**Organized by: Ecomondo Scientific Technical Committee, CNR, Italian Ministry of Economic Development, Cluster BIG**

The Conference aims to continue from previous Ecomondo's Editions the discussion on the challenges and opportunities of circular economy in several sectors of sea economy. Circularity principles at the base of the Circular Economy Package are very relevant in the context of the EU Green Deal, as they must be reflected in national strategies (e.g. BIT II - A new Bioeconomy strategy for a sustainable Italy; Italian Recovery Plan (PNRR - Piano Nazionale di Ripresa e Resilienza)). Following some keynote presentations on key trajectories of national and Mediterranean relevance, a series of pitches from science, academia, decision makers, private operators will showcase best practices and experiences in different sectors.

Section Chairs

Andrea Barbanti, National Research Council (CNR)
Roberto Cimino, Cluster BIG (Blue Italian Growth) and ENI
Maria Grazia Verdura, Italian Ministry of Economic Development

Programme

10.00 Introduction by the Chairs

10.10-11.25 **Session 1**

Blue Circular Economy and PNRR: actions and interactions
Giovanni Caprino, Cluster BIG and CETENA (center for naval engineering studies)

Reinassance Flagship Project
Gian Marco Luna, CNR-IRBIM (The Institute for Marine Biological Resources and Biotechnology of the National Research Council) and IT National Bioeconomy Coordination Board

Challenges and potentials of blue biotechnologies
Giovanna Romano, SZN, MUR-ITEM Project and WG BIG on Bioeconomy

Building the Mediterranean blue bioeconomy community: MED-PANORAMED Strategic Projects B-BLUE and BLUEBIOMED
Cristian Chiavetta (ENEA - Italian National Agency for New Technologies, Energy and Sustainable Economic Development) and Stefano Valentini (ART-ER Attractiveness Research Territory) Emilia-Romagna Joint Stock Consortium)

Critical raw materials in blue economy
Claudia Brunori, ENEA - Italian National Agency for New Technologies, Energy and Sustainable Economic Development

11.25-11.35 Q&A

11.35-11.50 Coffee break

11.50-13.15 **Session 2**

Offshore platforms sustainable retrofitting: a contribution to a circular blue economy
Antonio Dell'Anno, Marche Polytechnic University

Circularity of a safe and sustainable decommissioning and reuse of offshore Platform: results from CLYPEA researches
Ilaria Antoncicchi, Italian Ministry of Economic Development and Clypea Network

Holistic Life Cycle Analysis (LCA) Platform for the Shipping Industry
Marc Bonazountas, Epsilon Malta, Ltd, Project EMFF-EASME VesselsLife.com

Marine Litter: turning a problem into a resource - the marGnet and MAELSTROM projects
Fantina Madricardo, CNR-ISMAR (Institute of Marine Sciences - National Research Council)

Recover Ingredients: from bones and shells to cosmetic ingredients and plant fertilizers
Alessio Adamiano, Recover Ingredients s.p.a. and CNR-ISTEC (Institute of science and technology for ceramics - National Research Council)

Best practices of circularity in aquaculture
Michela Cariglia, Consorzio Gargano Pesca

rComposite: a new recyclable composite for pleasure boating
Fabio Bignolini, Northern Light Composites, COO

Creating Value from Carbon emissions
Nicola Mondelli, Rosetti Marino

The TT-Marine prototype
Alice Madonia, Nature 4.0 SB Srl

BlueBio COFUND/BlueMed CSA training course on blue bioeconomy: outcomes and future perspectives.
Renata Denaro, CNR-IRSA (Water Research Institute)

13.15-13.30 Marine restoration measures and Green Ports initiative for a sustainable blue growth

Enhancing circularity through waste prevention, repair and re-use: a key priority topic in the new LIFE 2021-2027 - ENGLISH LANGUAGE SESSION

Language: English

Simultaneous translation: Italian

Organized by: Ecomondo Scientific Technical Committee and the European Climate, Infrastructure and Environment Executive Agency (CINEA)

Opportunities provided by the higher levels of the Waste Framework Directive, such as waste prevention or re-use of resources, are often untapped. Weak economic viability (also due to lack of economic incentives), 'soft' regulatory requirements and limited awareness of the consumers are only some of the causes. In order to increase circularity the new Circular Economy Action plan strongly emphasises and focuses on Eco-design (and more generally, the so called, Design for the Environment approaches) as well as Re-use and Repair services. LIFE programme has identified such aspects as one of the key priority topics of the sub-programme 'Circular Economy and Quality of Life'.

The session will discuss why such opportunities are still unexploited, what is being done to support them in order to enhance circularity and how the LIFE programme can help related businesses with funding. Successful examples (also financed from LIFE programme) will be showcased.

Section Chairs

Angelo Salsi and Aurelio Politano (CINEA), European Commission

Programme

14.00-14.10 Introduction

Dirk Beckers, Director

European Climate, Infrastructure and Environment Executive Agency (CINEA), European Commission

Circular Economy in the clothing and textile chain

Language: Italian

Organized by: Ecomondo Scientific Technical Committee and FISE Unicircular / UNIRAU

In the last 25 years, the consumption of clothing in the EU has increased by 40% for a total per capita of 26 kg every year. The impact on environment caused by fast fashion passes through the consumption of water and soil for the cultivation of natural fibers, the pollution of the water for the various manufacturing processes, the dispersion of microplastics during the washing of synthetic garments, the emission of approximately 10% of the greenhouse gas each year, the disposal in landfills of large quantities of used clothes and the modest quantity of used clothes that are sent for recycling, net of those sent for reuse. To cope with these impacts, after having included in the WFD the obligation of separate collection of household textiles by 31.12.24 (in Italian transposition, 31.12.2021), the EU adopted in March 2020 a new action plan for the circular economy, which includes an important chapter dedicated to textiles, with the aim of developing eco-design and promoting reuse and recycling, and now the Commission is working on a "European strategy for textiles".

Section Chair

Andrea Fluttero, President UNIRAU (Union of used clothing collection, recycling and reuse companies)

Programme

Global Water Expo
Room D2 Pav.**SYSTEMIC WATER
CYCLE MANAGEMENT
AND VALORIZATION***Ecomondo Event - Call for
Papers***Systemic water-smart innovations to accelerate digital and ecological transition
in cities and regions**

Language: Italian

**Organized by: University of Brescia, Water Research Institute, Utilitalia, Marche Polytechnic
University, and Ecomondo Scientific Technical Committee****CALL FOR PAPERS**

A water-smart economy and society is oriented towards avoiding water scarcity and pollution, increasing resilience to climate change and managing water-related risks. This concept includes integration of stormwater, groundwater, wastewater management and water supply to cope with societal challenges related to climate change, resource efficiency and energy transition, to minimise ecosystem degradation and to improve recreational appeal in urban areas. Support EU Competitiveness, green jobs, and reduction of the emissions require investment in circular processes and water efficiency through digitalisation to reduce diffused pollution, over-abstraction of water and chemicals use, as leakage control. The conference will deliver a new vision in evaluating gains in water-smartness and sustainability at different scales. It will also demonstrate a range of promising technologies for water reuse, nutrient recovery, sludge minimization as well as smart data applications for more efficient resource allocation and use.

Monitoring & Control
Room D4 Pav.**MONITORING &
CONTROL***Ecomondo Event - Call for
Papers***Air pollution: the situation, control measures, risks and prevention policies**

Language: Italian

Organized by: Ecomondo Scientific Technical Committee and Higher Institute of Health**CALL FOR PAPERS**

The conference aims to create a meeting time to provide a picture of the last year experiences and programs carried out on the complex issue of air pollution. The conference aims to discuss the various technical and health aspects related to air pollution, to provide knowledge of the related problems and the possible solution/mitigation and to contribute to broadening the scientific debate on this issue.

Section Chairs

Gaetano Settimo, Higher Institute of Health
Gianluigi de Gennaro, University of Bari

Programme

14.00 Introduction by the Chairs

14.20-14.40 *Air pollution: the WHO activities and new guidelines*

Maria Neira, World Health Organization

14.40-15.00 *The national framework and European commitments*

Giusy Lombardi, Italian Ministry for Ecological Transition

15.00-15.20 *The actions and challenges in the Health and Environment Plans*

Pasqualino Rossi, Italian Ministry of Health

15.20-15.35 *Pulviris Project*

ISPRA (Italian Institute for Environmental Protection and Research), ENEA (Italian National Agency for New Technologies, Energy and Sustainable Economic Development), ISS (Higher Institute of Health), SNPA (National System for Environment Protection)

15.35-15.50 *National epidemiological study on air pollution and COVID-19 (EpiCovAir)*

Ivano Iavarone, Higher Institute of Health

15.50-16.05 *The planetary health: challenges and perspectives of a relationship between environment and health.*

Sara Moraca, University of Bologna-CNR ISAC Associated; Vincenzo Lionetti, Professor at Sant'Anna School for advanced studies (Pisa); Marie Studer, Senior Manager at Planetary Health Alliance (Harvard).

16.05-16.20 *The new Milan air quality and climate plan: air quality monitoring and modeling.*

Silvia Moroni, Marco Bedogni, Paolo Palomba, Mobility and Environment Agency (AMAT srl) - Municipality of Milan.

16.20-16.35 *Development of a method for PFAS, cC6O4 and ADV in atmospheric deposits.*

Fontana Marco, Santamaria Nicola, Possamai Simona, Arpa Piedmont Agency (Agency for the Protection of the Environment).

16.35-16.50 *Evaluate in an integrated way the impact of urban green, present and future, on the air in the city*

Mihaela Mircea, ENEA, Life Pre VEG-GAP; Valeria Stacchini, Bologna Metropolitan City, Life Pre VEG-GAP

16.50-17.05 *Experimentation of an integrated approach for assessing the potential impacts on air quality and citizens' health during street cleaning activities in urban areas.*

Brunelli, A., Breda S., Tinello A., Scanferla P., Badetti E., Marcomini A., University of Venezia Ca' Foscari Foundation, Calle Larga Foscari; Barbon L., Cremona P., Contarina SpA.

17.05-17.30 Discussion and closure by the Chairs

Poster Session**IA-1** Thermal boilers for civil use.

De Luca Pierantonio, UniCal

IA-2 Idrogeno verde: un'opportunità per la transizione energetica.

Matteo Altemura, Francesca Seni, Giulia Bernardini, Ambiente S.p.A.

IA-3 Prospects for reduction atmospheric emissions from iron and steel plants.

Francesco Cardellicchio

IA-4 ESG e sostenibilità: nuovi paradigmi e sintesi del quadro regolatorio europeo in divenire.

Lorenzo Parola

IA-5 Risk of COVID and respiratory diseases: the contribution to public health from new technologies that prevent the formation of fine particulate in diesel engines.

Andrea Demozzi, CEO IRIS LAB Srl Trento

IA-6 Nuovo modo di abbattere le molecole maleodoranti.

Ceccone Marilena, Senocair

Cascone Mariana, Senecaair

IA-7 *Deciding in complex systems: the great challenges for reducing pollution.*

Pivato Alberto, Department of Civil, Environmental and Architectural Engineering (ICEA), University of Padua

Enhancing circularity through waste prevention, repair and re-use: a key priority topic in the new LIFE 2021-2027 - SESSION WITH STREAMING IN ITALIAN LANGUAGE

Language: English
Simultaneous translation: Italian

Organized by: Ecomondo Scientific Technical Committee and the European Climate, Infrastructure and Environment Executive Agency (CINEA)

Opportunities provided by the higher levels of the Waste Framework Directive, such as waste prevention or re-use of resources, are often untapped. Weak economic viability (also due to lack of economic incentives), 'soft' regulatory requirements and limited awareness of the consumers are only some of the causes. In order to increase circularity the new Circular Economy Action plan strongly emphasises and focuses on Eco-design (and more generally, the so called, Design for the Environment approaches) as well as Re-use and Repair services. LIFE programme has identified such aspects as one of the key priority topics of the sub-programme 'Circular Economy and Quality of Life'.

The session will discuss why such opportunities are still unexploited, what is being done to support them in order to enhance circularity and how the LIFE programme can help related businesses with funding. Successful examples (also financed from LIFE programme) will be showcased.

Section Chairs

Angelo Salsi and Aurelio Politano (CINEA), European Commission

Programme

14.00-14.10 Introduction

Dirk Beckers, Director
European Climate, Infrastructure and Environment Executive Agency (CINEA), European Commission

Angelo Salsi, Head of Department D - Natural resources, climate, sustainable blue economy and clean energy
European Climate, Infrastructure and Environment Executive Agency (CINEA), European Commission

14.10-14.25 *Obstacles and opportunities to enhance Circularity*
Prof. Enrico Maria Mosconi, Full Professor of Technology and Management of Production - Chairman of the Master's degree in Circular Economy at La Tuscia University

14.25-14.40 *Circularity in the new CEAP and the upcoming new Sustainable Products legislative initiative (SPI)*
Paola Migliorini Deputy Head of Unit, B1 - Sustainable Production, Products & Consumption
DG Environment, European Commission

14.40-15.00 *Regulatory measures concerning some specific product categories*
Mattia Pellegrini, Head of Unit, B3 - Waste Management & Secondary Materials
DG Environment, European Commission

15.00-15.20 **Roundtable/Q&A: is this enough? What more can be done?**

Moderator:
Jordi Pascual, Cities Strategist
Circle Economy

Participants:

Laura D'Aprile, Head of Department for Ecological Transition (Italian Ministry for Ecological Transition)

Enrico Maria Mosconi, Full Professor of Technology and Management of Production - Chairman of the Master's degree in Circular Economy (La Tuscia University)

Paola Migliorini, Deputy Head of Unit, B1 - Sustainable Production, Products & Consumption Commission (EC)

Mattia Pellegrini, Head of Unit, B3 - Waste Management & Secondary Materials
(EC)

Marco Ravazzolo, Head of Environment and Energy, Industrial policies sector (Confindustria)

Angelo Salsi, Head of Department D - Natural resources, climate, sustainable blue economy and clean energy
(CINEA, EC)

15.20-15.40 Break

15.40-16.10 Presentation of 2 success stories

Presentation of LIFE project CIRCWASTE (LIFE15/IFE/EI/0000004)

Presentation of LIFE project CIRCWASTE (LIFE15/IT/000004)

CIRCWASTE is a seven-year LIFE IP project that promotes efficient use of material flows, waste prevention and new waste and resource management concepts. All actions contribute to implementing the national waste management plan and directing Finland towards a circular economy.

Tuuli Myllymaa, Head of Unit - Waste and circular economy-group
Leader of the CIRCWASTE-consortium
Finnish Environment Institute SYKE / Production and consumption center

Presentation of LIFE project Waste2Protein (LIFE18 ENV/DE/000011)

The project focus is a pilot plant for insect protein production from biowaste as sustainable alternative to fish and soy meal for animal feed.

Dr. Jonas Finck, Managing director/scientific project leader madebymade GmbH

16.10-16.30 *How the LIFE programme can help*

Aurelio Politano Senior Project Adviser, Unit D2 - LIFE Environment (Nature & Circular Economy)
European Climate, Infrastructure and Environment Executive Agency (CINEA), European Commission

Connecting the system of Ports and Harbours to unlock the potential in preventing and reducing the effects of Marine Litter across the Mediterranean - Ecomondo and Blue Sea Land Joint Event - VERSIONE IN LINGUA INGLESE

Language: English
Simultaneous translation: Italian

Organized by: Ecomondo Scientific Technical Committee, Blue Sea Land, Cluster BIG, Federpesca, CNR (National Research Council of Italy), BLUEMED GSOs

European, National and Regional policy instruments have been developed to prevent and reduce the environmental and socioeconomic impact due to the mismanagement of waste coming from marine and coastal activities. With the aim to close the loop of maritime waste cycle, specific actions to address waste prevention and waste delivery in harbours have been proposed and here showcased. EU Directive 2000/59/EC on port reception facilities (PRF) for ship-generated waste and cargo residues obliges Member States to ensure the availability of adequate port reception facilities so as to reduce the discharges of ship-generated waste and cargo residues into the sea. Harmonisation of the waste disposal rate structure provisions in the PRF Directive could be helpful to enhance the effectiveness of the instrument. The Commission also supports the implementation of the flagship Directive on Single-Use Plastics (SUP) in line with the EU Green Deal and the circular economy package. Here the gaps for the implementation of marine litter solutions are discussed together with key National and Mediterranean actors with the aim to bring local actions into systems.

Section Chairs

Luigi Giannini, Federpesca
Nino Carlino, Blue Sea Land
Sigi Gruber, European Commission
Fantina Madricardo, CNR (National Research Council of Italy)

Programme

14.30-15.30 Opening by the chairs

Session 1: *Setting the scene and connecting the dots for the implementation of R&I solution to tackle marine litter in Mediterranean Sea*

Session Chair: Sigi Gruber, European Commission

14.40-15.15 *The process of revising the waste legislation from EU to National level*

- Nino Carlino, Blue Sea Land
- Imad Rachid Lahoud, General Fisheries Commission for the Mediterranean - GFCM (TBC)
- Ilde Gaudiello, Directorate-General for the Circular Economy, Italian Ministry for Ecological Transition

15.15-15.30 *Back-to-back outcomes of the Venice BlueMed Pilot Event*
Fedra Francocci (CNR IAS) and Fantina Madricardo (ISMAR CNR)

15.30-16.10 Session 2: *Innovation towards good performing ports: building frameworks for circular economy*

Session Chair: Fantina Madricardo, ISMAR CNR

- Gian Marco Luna, CNR CISP-FLAG Regione Marche
- Valentina Zambetti, Techneproject
- Building bridges: discussion with Ambassadors and Ministries from Blue Sea Land

16.10-17.00 Session 3: *Upscaling local actions into systems*

Session Chair: Luigi Giannini, Federpesca

- Francesca Biondo, Federpesca
- Stefania Di Vito, Legambiente
- Roberto Cimino, Cluster BIG (TBC)
- Phoebe Koundouri, Athens University of Economics and Business; Fellow World Academy of Art and Science; President-Elect of the European Association of Environmental and Resource Economists; Co-chair SDSN Europe & SDSN Greece

Circular Economy as a common voice - ITALIAN LANGUAGE VERSION

Language: Italian
Simultaneous translation: English

Organized by: Ecomondo Scientific Technical Committee and Intesa Sanpaolo

After nearly two years of COVID crisis, the need to contrast climate change, biodiversity loss and pandemics has become a priority more than ever. And we know circular economy is anchored in innovative nature-based solutions and geared towards thrive and competitiveness while promoting public well-being, in line with the UN Agenda 2030 (17 SDGs) and European Commission's Green Deal: but which is the state of the art in the discussion about economic regeneration?

Economic and environmental resilience can be enhanced by circular and low carbon economies: this can be the framework where public and private sectors should work in partnership for common reflections around business and policies to create a long-term prosperity.

Still, what should be revised within the circular economy and bioeconomy agendas at local and global level? How financial supports – like Next Generation EU or private sector initiatives – for re-launching the economy should be used to widen the commitment of new actors in the circular economy transition? How will this also contribute to prevent future pandemic crisis and to fix climate change?

Section Chairs

Fabio Fava, Presidente Comitato Tecnico Scientifico, Ecomondo
Massimiano Tellini, Director Global Head Circular Economy, Intesa Sanpaolo

Programme

14.30-14.45 Introduction by the Chairs

14.45-15.45 *Circular economy and the climate agenda: what can be done within COP26*

WASTE MANAGEMENT AND VALORIZATION*Ecomondo Event: Policies & Regulations***Waste Management and regulatory changes 2021**

Language: Italian

Organized by: **Ecomondo Scientific Technical Committee and Edizioni Ambiente and Magazine "Waste - Regulatory Information Bulletin"**

The legislative dynamism characterizing the waste management, could disorient businesses and public administration. The Magazine "Rifiuti – Bollettino di informazione normativa" offers again this year, in Ecomondo, the usual overview of the most important legislative and regulatory changes that, during 2021, were added on an already arduous operational scenario. Besides the novelties, however, some less recent topics that reached, over the years, a certain grade of complexity in the application, will be deeply analyzed. Therefore, the necessary insights that the discipline's complexity always requires are also carried out.

Sold out event**Section Chair**

Paola Ficco, Director of the Magazine "Rifiuti – Bollettino di informazione normativa"

Programme

14.40 Temporary storage of waste at retailers of new materials. The case of construction and demolition waste

Paola Ficco, *Environmental lawyer* - Director of the Magazine "Rifiuti – Bollettino di informazione normativa"

14.55 Waste management from the circular economy perspective

Laura D'Aprile, *Head of the Department for Ecological Transition and Green Investments – Ministry of Ecological Transition*

15.10 The IT traceability of waste: state of the art

Daniele Bagon, *Register of Environmental Operators, Liguria Regional Section*

15.25 The new administrative sanctions on waste

Stefania Pallotta, *Head of Legality Protocols and Sanctions Service of the Metropolitan City of Venice*

15.40 Landfills and the problem of accredited laboratories

Implementing the NRRP: the tools proposed by the Farming for Future project

Language: Italian

The climate crisis and the constant increase in emissions are a crucial challenge for Europe and Italy. The NRRP has defined specific lines of action aimed at a resource-efficient growth capable of reducing greenhouse gas emissions to achieve carbon neutrality by 2050. In this context, Farming For Future is the proposal from the agricultural world that aims to turn the climate crisis into an opportunity to increase the competitiveness and sustainability of Italian agriculture and livestock farming. The proposal is based on the implementation of 10 actions for a real agro-ecological transition that leads agriculture not only to reduce its emissions, but also to contribute to the reduction of emissions related to the use of fossil fuels through the production of biogas/biomethane according to the principles of Biogasdoneright@.

Programme

CONFERENCES***Ecomondo Event - Call for
Papers***Caring for soil is caring for life: soil health policies and innovation - ITALIAN
LANGUAGE SESSION**Language: Italian
Simultaneous translation: English**Organized by: Ecomondo Scientific Technical Committee, European Mission for Soil Health and
Food, Re Soil Foundation, Coldiretti**

Life on Earth depends on healthy soils. The soil under our feet is a living system – home to many fascinating plants and animals, whose invisible interactions ensure our well-being and that of the planet. Soils provide us with nutritious food and other products as well as with clean water and flourishing habitats for biodiversity. At the same time, soils can help slow the onset of climate change and make us more resilient to extreme climate events such as droughts and floods. Soils preserve our cultural heritage and are a key part of the landscapes that we all cherish. Simply put, healthy living soils keep us, and the world around us, alive. Although we pay very little attention to soil, which is a fragile resource that needs to be carefully managed and safeguarded for future generations. One centimeter of soil can take hundreds of years to form but can be lost in just a single rainstorm. Even where soil degrades more slowly hidden beneath our feet, the effects are severe and difficult to reverse. 60-70% of EU soils are unhealthy, 25% of land are at high or very high risk of desertification in Southern, Central and Eastern Europe. It is estimated that the costs associated with soil degradation in the EU exceed 50 billion € per year. All this not only affects our economy, but also safe food production and what nature provides for humanity to survive. The European Commission Mission's goal is that by 2030, at least 75% of all soils in each EU Member State are healthy or show significant improvement. So, we need to act now!

The conference will offer an overview of the evolution of strategies and policies closely related to soil health and will show case studies of how a regenerative agriculture and the circular bioeconomy, which see their starting and ending point in the soil, represent an essential tool for reversing the course of soil degradation, creating value in the territories.

Caring for soil is caring for life: soil health policies and innovation - SESSION WITH STREAMING IN ENGLISH LANGUAGE

Language: Italian

Simultaneous translation: English

Organized by: Ecomondo Scientific Technical Committee, European Mission for Soil Health and Food, Re Soil Foundation, Coldiretti

Life on Earth depends on healthy soils. The soil under our feet is a living system – home to many fascinating plants and animals, whose invisible interactions ensure our well-being and that of the planet. Soils provide us with nutritious food and other products as well as with clean water and flourishing habitats for biodiversity. At the same time, soils can help slow the onset of climate change and make us more resilient to extreme climate events such as droughts and floods. Soils preserve our cultural heritage and are a key part of the landscapes that we all cherish. Simply put, healthy living soils keep us, and the world around us, alive. Although we pay very little attention to soil, which is a fragile resource that needs to be carefully managed and safeguarded for future generations. One centimeter of soil can take hundreds of years to form but can be lost in just a single rainstorm. Even where soil degrades more slowly hidden beneath our feet, the effects are severe and difficult to reverse. 60-70% of EU soils are unhealthy, 25% of land are at high or very high risk of desertification in Southern, Central and Eastern Europe. It is estimated that the costs associated with soil degradation in the EU exceed 50 billion € per year. All this not only affects our economy, but also safe food production and what nature provides for humanity to survive. The European Commission Mission's goal is that by 2030, at least 75% of all soils in each EU Member State are healthy or show significant improvement. So, we need to act now!

The conference will offer an overview of the evolution of strategies and policies closely related to soil health and will show case studies of how a regenerative agriculture and the circular bioeconomy, which see their starting and ending point in the soil, represent an essential tool for reversing the course of soil degradation, creating value in the territories.

Ecomondo Event

Circular economy: one of the aspects of articulation of the value chains in the built environment supply chains

Language: Italian

Organized by: Ecomondo Technical Scientific Committee, ANPAR, GBC Italia

Construction must be completely rethought as a whole and in all its phases (design, construction, maintenance, end of life), also in consideration of its inclusion among the priority sectors of the measures provided for in the European Green Deal. The change is requested by the Next generation EU program, but it is already underway in some countries of the world and partly also in Italy (with Milan as the absolute protagonist). The possibility of obtaining funding from the European Union will be a further lever, but the change must be integral and coordinated by the Public Administration, which must be ready. The various protocols of the Green Building Council, like the other existing ones, can be a valid tool for evaluating the sustainability of the new building, but also of the maintenance and demolition works of buildings. We believe that the measures and interventions concerning infrastructures and their design, construction and maintenance methods must be shared between the ministries of ecological transition, economic development and infrastructure. The round table will be useful to verify the sharing of this approach and what is being done concretely to deeply rethink the way of building.

Section chair

Giorgio Bressi, ANPAR - National Association of Recycled Aggregates Producers

Program

9.30-9.45 Presentation by Marco Mari, GBC Italia (Green Building Council)

9.45-10.15 *The European Framework for Sustainable Construction*

Mattia Pellegrini, Head of Unit DG Env European Commission - B3 "Waste management and secondary material"

10.15-10.30 *Circular Design*

Patrizia Vianello, OICE (employers' Association representing Italian engineering, architectural and technical economic consulting organizations)

10.30-10.45 *Circular construction*

Pietro Petrucco, ANCE (National Association of Construction Companies)

10.45-11.00 *GBC Italia protocols for assessing the sustainability of buildings and the built environment*

New management options and assessment tools to accelerate the transition towards circular economy

Language: Italian

Organized by: Ecomondo Scientific Technical Committee, Italian Chemical Society – Division Environmental and Cultural Heritage Chemistry, ATIA – ISWA, Italian LCA Network – WG Waste Management and Treatment**CALL FOR PAPERS**

The commitment recently undertaken by the European Union through the initiative called “Green Deal”, to tackle climate and environment-related challenges, requires a decisive action towards a significant reduction and a proper management of waste, to avoid or minimize its environmental impact.

In the meanwhile, the health emergency relating to the COVID-19 pandemic resulted in significant changes in the amount of generated waste (a decrease especially due to the partial suspension of economic activities), in its composition (an increase in disposable plastic for safety reasons, e.g. facemasks and gloves), and in management methods (with a higher probability of infection risks related also to urban waste).

Considering both the long-term targets and the contingent events, this seminar wishes to present innovative initiatives and projects of waste prevention and management, tools for good practices application, methods for the measurement of impacts from a “life cycle” perspective, models for the quantification of material flows and the evaluation of system circularity, case studies of environmental, economic and social sustainability assessment.

Section Chairs

Fabrizio Passarini, University of Bologna

Lucia Rigamonti, Polytechnic University of Milan

Fabio Iraldo, Sant'Anna School of Advanced Studies of Pisa

Danilo Bonato, D.G. Erion (Multi-consortium system for the management of waste associated with electronic products)

Programme

9.20-9.30 Introduction by the Chairs and a short summary on the papers presented through posters

9.30-10.45 Invited lectures

9.30-9.45 Augusto Bianchini (University of Bologna)

VivACE: a visualization model to manage the companies' transition processes and achieve the objectives of the circular economy

9.45-10.00 Rosa Schina (ANCI Tuscany - National Association of Italian Municipalities)

Waste from Electrical and Electronic Equipment (WEEE): treasures to recover! – LIFE WEEE Project

10.00-10.15 Silvia Passoni (Lombardy Region)

Support European regions in reducing plastic waste – Interreg PLASTEKO Project

10.15- 10.30 Massimiliano Mazzanti (University of Ferrara)

Innovative strategies for the circular bioeconomy: results of a survey on Italian manufacturing SMEs in 2019-20

Impact assessment of the start of the regulation on the waste management companies and perspectives on the new regulatory measures

Language: Italian

Organized by: Ecomondo Scientific Technical Committee and Utilitalia

In 2021 the regulatory activity concerning municipal waste management was marked by some very important measures: tariff regulation for treatment plants, the application of national criteria concerning technical quality and contracts, the updating of the Tariff Method for Waste, consistently with the principles of transparency and an efficient and effective allocation of public resources deriving from tariffs charged to users. The conference aims to make an impact assessment of the regulatory measures on operational activity and investment programs of the waste management companies. An analysis of the scope of the most recent regulatory measures will also be carried out.

Section chair

Organized by: Ecomondo Scientific Technical Committee & ISPRA

The Law 128/2019 introduced the possibility to issue authorizations pursuant to Articles 208, 209 and 211 for carrying out the recovery operations resulting in end of waste, when in absence of specific national criteria.

Paragraph 3-ter establishes a monitoring system of the plants authorized "case-by-case" assigning the competence to the Italian National System for Environmental Protection (SNPA).

The day represents an opportunity to evaluate the application of the Law, the critical issues and the solutions adopted during its application.

Trees, forests and agro-forestry: green infrastructures to support the environment, the economy and the quality of life

Language: Italian

Organized by: Ecomondo Scientific Technical Committee and Confagricoltura, UNITUS**CALL FOR PAPERS**

The Italian National Recovery and Resilience Plan, within the broader Next Generation program for Europe, definitely recalls the importance of reforestation, ecological restoration of natural environments and landscapes and forest infrastructures in urban and rural environments, as fundamental objectives for the ecological transition of our country, and of Europe as a whole. The European target of planting billions of trees is identified as an essential tool for a win-win strategy, to achieve at the same time an effective mitigation of climate change, the conservation and recovery of biodiversity, and a better quality of life and human health. Among the priority areas to be ecologically restored there are certainly lowland environments, coastal areas, and wetlands and riparian ecosystems, all areas where agroforestry, afforestation and green infrastructures will be able to make a decisive contribution to the achievement of the objectives of the European Green New Deal.

Alternative financial instruments and tools for a sustainable transition

Language: Italian

Organized by: Ecomondo Scientific Technical Committee and ART-ER

The beacon conference will focus on financial instruments to support SMEs, Start-ups and new firms in their green growth and sustainable investment. Alternative finance market - that is, alternative financial instruments to traditional bank credit - a gradually growing market - will be presented too. These are tools that offer SMEs, Start-ups and new firms wishing to undertake investment and growth paths different opportunities and that, in addition to allowing one diversification of the company's sources of financing can contribute in a way significant to increase the visibility of the company and to encourage and the entry of new investors.

The conference will be an opportunity for a discussion with experts in the field and to hear from some testimonials from companies that have decided to use these tools.

10.00 Introduction by the Chairs

10.20-10.50 *Financing a new generation of firms: Next Generation EU and beyond*
Silvia Grandi, University of Bologna and Italian Ministry of Economic Development

10.50-11.20 *The future of European taxonomy: a new classification for harmful activities and those without significant impacts on the environment*
Paolo Marullo Reedtz, Member of the Sustainable Finance Platform

11.20-11.40 *Finance for sustainable development between SRI and new financial services promoting SDGs*
Francesco Timpano, working group coordinator of ASVIS - Italian Alliance for Sustainable Development

11.40-12.00 *The Digital Impact Platform as sustainable finance services*
Filippo Addarii, PlusValue Advisory Ltd

12.00-12.20 *Investors and sustainable investment*
Mariagiulia Drivas, Doorway platform co-founder and Business Angel

12.20-12.40 *Impact investing for sustainable business models in the Southern Mediterranean. Common challenges, global opportunities*
Alessandro Miraglia, SwitchMed Initiative

12.40 *Discussion and Closure*
Vincenzo Colla, Assessor for economic development and green economy, work, training, Emilia-Romagna Region

Ecological transition and Recovery Fund in the remediation and redevelopment of contaminated sites in Italy

Language: Italian

Some introductory reports will be provided by invitation, by the Administration or Public Institutions considering the community guidelines for the transition to the circular economy. A round table will follow with the possibility of interaction with the public.

Section Chairs:

Marco Petrangeli Papini, University of Rome "La Sapienza"
Donatella Giacometti, UNEM - Energies for Mobility Union
Giorgio Zampetti, Legambiente (Italian environmental association)

Programma

10.00-10.05 Introduction by the Chairs

10.05-10.15 Welcome

Giuseppe Lo Presti, Directorate General for the Environmental Remediation, Italian Ministry for Ecological Transition

10.15-10.30 Giorgio Zampetti, General Director of Legambiente

10.30-10.45 Guido Bonfedi, Head of Technological Innovation, Technical Coordination and Laboratory Services, ENI Rewind

10.45-11.00 Elisabetta Perrotta, FISE Assoambiente (Association of environmental services companies)

11.00-11.30 *The first guidelines on the assessment of environmental damage (SNPA n. 33/2021): remediation identity and differences*

Antonio Guariniello, Paola Di Toppa, Paolo Rinaldi, Maurizio Guerra - ISPRA (Italian Institute for Environmental Protection and Research)

11.30-11.45 Marco Lupo, Director of ARPA (Regional Agency for the Protection of the Environment) of the Lazio Region – Vice President of SNPA (National System for Environment Protection)

11.45-12.00 Rossella Muroli, Vice President of the Chamber of Deputies Environment Commission

12.00-13.00 Round table with speakers

Moderators: Marco Petrangeli Papini, Donatella Giacometti e Alessandro Bratti (ISPRA General Director)

Linking recovery fund to regulation and long-term sustainable finance: how are we supporting climate neutral and circular water-smart economy? European case studies and innovations

Language: Italian

Organized by: European Water Regulators (WAREG), Ecomondo Scientific Technical Committee, UTILITALIA, REF Ricerche

According to an OECD study**, the current capital expenditure only in the drinking water and wastewater industry in the 27 EU Member States is EUR 85 billion per year, with an estimated investment gap of more than EUR 25 billion per year until 2030 to fulfil all the requirements of the EU legislative acquis on water. Additional challenges are related to the achievement of the ambitious Green Deal objectives and the strategies to strategically benefit of the "Next Generation EU" plan. The workshop will provide an overview of relevant EU and national public and private investments tools in place or under development to ensure a full transition to ecological and carbon neutrality by 2050.

Section Chairs

Andrea Guerrini, WAREG, Ecomondo Scientific Technical Committee

Samir Traini, "REF Ricerche" Society

Giordano Colarullo, General Director of UTILITALIA (Italian federation of energy, water and environmental services)

Programme

10.00 Introduction by the Chairs

10.20 Climate Bank Roadmap – EIB's support to climate action and environmental sustainability

Alessandro Ronzoni, European Investment Bank

10.40 EU taxonomy in the water services: how to align with the new paradigm to finance "green" investments in the water sector

Samir Traini, Laboratorio SPL "REF Ricerche" Society

11.00 The contribution of regulation to European Green Deal objectives: tools for promoting innovation and carbon neutrality

Andrea Guerrini, ARERA (Italian Regulatory Authority for Energy, Networks and Environment)

11.20 Q&A and discussion

11.30 Break

11.40 Linking regulation and innovation in water services: best practices and strategies from local governance.

Alessandro Mazzei, Tuscany Region Water Authority (TBC)

12.00 Green bonds – Italian case studies

Gianpiero Grotti, IREN SpA (Italian multi-utility group)

Monica Manto, ViveracquaIREN SpA

12.40 Regulating choices for improving or promoting circular economies in water services: an analysis on WAREG regulators experience.

Christian Minelli, WAREG

13.00 Analysis of ecosystem services to define environmental and resource costs (ERC) for integrated water service

Riccardo Santolini, University of Urbino "Carlo Bo"

13.20 Q&A

13.40 **Discussion and Closure (by the chairs)**

CITIZENS MATTER. The role of people in the sustainable transformation of packaging processes

Language: Italian

Organized by: Ecomondo Scientific Technical Committee, Italian Cluster "Made in Italy", University of Bologna

The Observatory in Packaging Innovation of the University of Bologna focuses its attention on a key link in the value chain, the consumers of packaged products: by driving innovation, in fact, citizens can significantly change the sustainability outcome of the sector and, at the same time, they can influence the behavior of every other actor in the chain.

Awareness and knowledge are at the basis of a feeling of co-responsibility and participation that can be activated in citizenship, all fundamental themes for closing the circle. If we manage to treat packaging with the appropriate importance, it can once again become a fantastic opportunity for post-industrial society and can make up for the Anthropocene. For this reason, packaging is not only an issue with problems that seek answers from the industrial, chemical, graphic-communication, process and logistics sectors, but it is also a problem linked to our behaviors, and must become a collective opportunity.

Which realities point the way? Which virtuous cases can inspire us? Which companies have understood this process? In which cities do Public Administrations encourage, incite and form these consciences?

The event will analyze the key role of citizens in the sustainable transformation of packaging processes together with companies, associations, consortia, institutions and researchers.

Section Chair

Flaviano Celaschi, Italian Cluster "Made in Italy"

Programme

10.00-10.10 *Introduction to the Conference: Presentation and ongoing research methodologies*
Flaviano Celaschi, Italian Cluster "Made in Italy"

10.10-10.25 *Presentation of the Packaging Innovation Observatory of the University of Bologna*
Clara Giardina, Advanced Design Unit - Alma Mater University of Bologna

10.25-11.20 *Awareness and Responsibility*

Conai Consortium - Simona Fontana, Head of study center prevention area

Cosmetica Italia - Matteo Locatelli, Vice president

Tomra - Filippo Montalbetti, Circular Economy, VP Governmental Affairs Central Europe

11.20-12.15 *Infrastructure and Engagement*

Asvis (Italian Alliance for Sustainable Development) - Eleonora Rizzuto, Coordinator of the ASviS Goal 12 WG, President and founder of AISEC (Italian Association for the Development of the Circular Economy)

University of Basilicata Region - Saverio Massaro Ph.D., Dicom, Dip. European and Mediterranean Cultures

Hera - Milena Zappoli, Head of Innovation, Technology and Environment and Fleet Systems Management

12.15-13.10 *Ethics and Collaboration*

Carta Etica del Packaging Foundation - Lucia Lamonarca, Marketing and Communication Consultant

FIU, Urban Innovation Foundation - Mauro Bigi, Sustainability and accessibility coordination

Altroconsumo - Luisa Crisigiovanni, General Secretary

13.10-13.30 Q&A, Discussion and Closure (by the chair)

BLUE GROWTHEvent with the European
Commission

Unlocking Opportunities for a Green Blue Economy

Language: English

Organized by: Ecomondo Scientific Technical Committee and CINEA (Sustainable Blue Economy Unit)

The blue bioeconomy sector has high potential in contributing not only to blue growth but also in supporting a green transition for industries. This one-day thematic workshop is organised in the context of the BlueInvest platform and shall bring together entrepreneurs, corporates, investors and stakeholders from the blue bioeconomy. It shall look into areas where European innovation can have a competitive advantage and potentially transform industries. The activities will tackle the several areas as, for instance, algae, novel foods, nutraceuticals, food additives and animal feeds, pharmaceuticals and cosmetics, green chemicals and materials, enzymes for green industrial processing or decontamination.

Interested in attending physically? Let us know [here](#)

Programme

10.00-10.30 **WELCOME**

Remarks by

Andreea STRACHINESCU, Head of Unit, "Maritime Innovation, Marine Knowledge and Investment", DG MARE, European Commission
Luca MARANGONI, Deputy Head of Unit, European Climate, Infrastructure and Environment Executive Agency (CINEA), European Commission
Daniela Cedola, Project Director, BlueInvest

10.30-11.15 **THE GREEN BLUE ECONOMY: MARKET DEVELOPMENTS, INNOVATION TRENDS AND INVESTMENT OPPORTUNITIES**

Moderated panel discussion with Q&A

Key stakeholders shall present market opportunities for the Green Blue Economy, including the most recent innovation trends and major developments.

The sectors of opportunity shall cover blue bioeconomy, circular economy solutions including ocean plastic pollution and the sustainable management and conservation of natural capital.

Pierre Abadie, Head of Climate, Tikehau Capital
Ruben Eiras, Secretary General, Forum Oceano
Frédéric Degret, Founder and President, NOAH ReGen, Blue Economy Investment Platform (BEIP)

11.15-12.00 **INVESTOR SPOTLIGHT: FINANCING A RESTORATIVE GREEN BLUE ECONOMY FOR HEALTHY OCEANS AND WATERS**

Moderated panel format, with Q&A

Four investors focused on the Blue Economy shall be invited to do a reverse pitch.

Luke HALSEY, Partner, AiiM Partners
Lynton Francois BURGER, Ocean Impact Investor, Venture4th
Frank CORDESMEYER, Founder & Managing Partner, Good Seed Ventures

12.30-13.30 **BREAK**

13.30-13.45 **FUNDING OPPORTUNITY: LIFE PROGRAMME**

A showcase of LIFE Programme – EU's funding instruments for the environment and climate action: initiatives, projects and results

Angelo SALSI, Head of Department, CINEA.D - Natural Resources, Climate, Sustainable Blue Economy and Clean Energy

13.45-14.45 **PITCH SESSION I | GREEN BLUE BIOECONOMY**

5 high potential companies and projects will pitch to an audience of investors, venture mentors and coaches.

FISH4FISH, Biodegradable alternative to plastic packaging for fish

BIOGEARS, Biobased ropes for aquaculture

EASYFEED, Innovative, organic aquaculture formula for feed

ERANOVA, The 3rd generation of biobased resins

FICOSTERRA, Biological crop booster technology

Investor panel

Frank CORDESMEYER, Founder & Managing Partner, Good Seed Ventures

Frank CORDESMEYER, Founder & Managing Partner, Good Seed Ventures
 Luke HALSEY, Partner, Aiim Partners
 Lynton Francois BURGER, Ocean Impact Investor, Venture4th

Project experts

Charlotte JAGOT, EMFF/EMFAF, CINEA, European Commission
 Vincenzo GENTE, EMFF/EMFAF, CINEA, European Commission
 Aurelio POLITANO, LIFE, European Commission
 Mario LIONETTI, LIFE, European Commission

14.45-15.00 **BREAK**

15.00-16.00 **PITCH SESSION II | GREEN BLUE CIRCULAR ECONOMY**

5 high potential companies and projects will pitch to an audience of investors, venture mentors and coaches.

LIFE WASTE2PROTEIN, Insect protein production from biowaste as sustainable alternative to fish and soy meal for animal feed

LIFE-LIBAT, Innovative technological solution for the recycling of primary lithium batteries, particularly lithium-manganese batteries; process integrates mechanical pre-treatment with a hydrometallurgical treatment

BIOFABRIK, Plastic catalytic depolymerization

ORIGIN BY OCEAN, Feed from blue-green algae & bladderwrack. Industrial-scale collection of blue-green algae and large-scale bladderwrack farming

PUROCEANS, Removing pollution and micro-plastics from the ocean's seabed.

Investor/expert panel

Frank CORDESMEYER, Founder & Managing Partner, Good Seed Ventures
 Luke HALSEY, Partner, Aiim Partners
 Lynton Francois BURGER, Ocean Impact Investor, Venture4th

Project experts

Charlotte JAGOT, EMFF/EMFAF, CINEA, European Commission
 Vincenzo GENTE, EMFF/EMFAF, CINEA, European Commission

AND SITE
REQUALIFICATION***Ecomondo Event - Call for
Papers***Sustainable strategies for the remediation of polluted sites: virtuous examples and recent developments in national and international applied research**

Language: Italian

CALL FOR PAPERS

The conference will be more specifically dedicated to the remediation technologies, with case studies that highlight their actual extent and their limits. The interventions will be fully selected by the call for papers. In recent years, scientific research has allowed significant improvement both in the understanding of the dynamics of contamination and in the development of appropriate technologies for the characterization and remediation of polluted sites. There are notable developments in the field of "sustainable" remediation technologies, a term which in the case of remediation often coincides with that of "effective".

Section Chairs

Marco Petrangeli Papini, University of Rome "La Sapienza"
Donatella Giacometti, Unem - Energies for Mobility Union

Programme

14.00-14.15 Introduction by the Chairs

14.15-17.15 *Speeches from the Call for Papers*

14.15-14.30 *Fast and versatile in situ treatment for sites contaminated by petroleum hydrocarbons - Italian and international cases*

M. Donati et al., REGENESIS Italia

14.30-14.45 *Effects of non-ionic Surfactants on the Mobilization of Hydrophobic Organic Contaminants: Batch and Column Experiments*

N. Amanat et al., University of Rome "La Sapienza" - Chimec

14.45-15.00 *Ecotherm smart unit system integration – il rivoluzionario sistema integrato per la gestione degli impianti di bonifica*

L. Mantilacci e D. Natoli, Ecotherm

15.00-15.15 *In-situ Thermal Desorption: Case study for soil polluted by cocktail of contaminants*

Youssef Ourrid et al., Haemers Technologies

15.15-15.30 *In situ thermal desorption intervention*

R. Costa e F. Ioppolo, Arcadis Italia S.r.l.

15.30-15.45 *Ex-situ soil washing project in France*

Lucia Maruffi, REMEA

15.45-16.00 *Implementation of a pilot scale bioelectrochemical process for the remediation of groundwater*

M. Zeppilli et al., University of Rome "La Sapienza"

16.00-16.15 *End of waste solution for the remediation of soils contaminated by pyrite ashes*

P. Scanferla et al., Ca' Foscari University Foundation, TEV group srl, ARPAL, Mapei S.p.A. University of Padua

16.15-16.30 *New perspectives for rethinking landscapes in crisis. Reclamation as an integrated tool for urban and territorial regeneration*

V. Vittiglio e Libera Amenta, University of Campania Region "Luigi Vanvitelli" - University of Naples Federico II

16.30-16.45 *Application of the D.M. 46/19 to a real case*

P. Angelini et al., Eni -Energy Evolution Green / Traditional Refining & Marketing - HPC Italia s.r.l.;

16.45-17.00 *Is sustainable remediation possible? A real case of groundwater remediation with no water consumption*

D. Donati et al., HPC Italia

17.00-17.15 *Eni Rewind remediation technologies at the Gela (CL) site: Eni's e-Hyrec® technology*

C. Lanari et al., ENI Rewind

17.15-17.25 *Activities and progress of the reclamation of fuel outlets active in Italy through an integrated treatment approach based on ISCO and ENA*

Alberto Leombruni (PeroxyChem LLC) , Francesco Ioppolo (Arcadis Italia Srl), Mike Mueller (PeroxyChem LLC)

17.25-17.35 *Phytotechnologies, Synergy between research and industry for urban interventions*

L. Passatore et al., Istituto di Ricerca sugli Ecosistemi Terrestri (IRET) - Consiglio Nazionale delle Ricerche (CNR) - C.I.S.A. SpA

Eco-innovative solutions for the valorization of End-of-life tyre and rubber-based production residues

Language: Italian

Organized by: Ecomondo Scientific Technical Committee and FISE Unicircular sect. Unirigom

CALL FOR PAPERS

Tyres and automotive component applications, which represent overall about 75% of the rubber demand at the European level, makes very little or no use of reprocessed rubber feedstock, mainly for technical issues. Reclaimed rubber from End-of-Life Tyres (ELT) recycles and grounded rubber production waste are used at very low concentrations (3%-5%) for the manufacturing of tyres. The increasing cost of raw materials and the environmental issues related to their consumption, could push the material recycling rate of rubber waste, turning derived rubber materials into valuable substitutes of virgin polymers in the production of rubber. Thus, while reducing raw material costs, decreasing CO2 and improving carbon and material footprint, material recycling and upcycling is helping mindful companies to improve their product sustainability and profitability through its ecologically sound products and innovative principles.

Section Chair

Andrea Fluttero, President of FISE Unicircular (Circular Economy Companies Union) sect. Unirigom (Union of Italian rubber recoverers)

Programme

14.00 Introduction by the Chair

14.20-14.40 *Circular valorisation of rubber waste and scraps*

Fabio Bertolotti, Assogomma (Rubber Industries, Electric Cables and related Association)

14.40-15.00 *Life Green Vulcan: High performance devulcanized masterbatches for End-of-Life Tyre reuse in high-volume technical compounding applications*

Giuseppe Magistrale, Rubber Conversion

15.00-15.20 *ELT selective devulcanization and conversion to advanced fuels by energy self-sustainable and low-impact DES+™ process*

Massimo Aiello, Acea Ambiente (Italian multi-utility group - environment unit), Business Development Division

Flavio Manenti, Milano Polytechnic University, Chemical Engineering Dept. "Giulio Natta"

Omar Pellegrini, Microgomma Energia

15.20-16.40 Call for Papers:

Characterization of rubber/ELTs industrial scraps additivated with electric furnace slag

Anna Gobetti, University of Brescia – Mechanical and industrial engineering Dept.

Versalis Revive®: new "circular" elastomers for more sustainable tyres

Costantino Perretta, Versalis S.p.A.

Tyres as a model for the complementary recovery of material and energy: the agreement between Eni and Ecopneus for eco-innovative solutions in the use of ELTs

Roberto Palmieri, ENI

A roadmap towards sustainable waste management practices worldwide - SESSION WITH STREAMING IN ITALIAN LANGUAGE

Language: English
Simultaneous translation: Italian

Organized by: **International Solid Waste Association, supported by Ecomondo Scientific Technical Committee**

In 2015, the Global Waste Management Outlook (GWMO) provided a scientific global assessment on the state of waste management and a call for action to the international community. The GWMO estimated at that time that 2 billion people worldwide lacked access to a basic waste collection service, while around 3 billion lacked access to controlled disposal services for municipal solid wastes.

Where are we now? Recently ISWA launched the report: The Future of The Waste Management Sector: Trends, Opportunities and Challenges for the Decade, which highlights the key issues around the transition to a circular economy, the role waste management will play in achieving the Sustainable Development Goals (SDGs), and combatting climate change.

During this conference several experts will speak on how they see the future of global waste management both worldwide as in Mediterranean countries.

In the last hour we will focus on an important topic of sustainable waste management, organic waste recycling in Mediterranean countries. An interesting panel from and several experts will join the stage and give you tangible insights into sustainability and organic waste recycling.

Section Chairs

Carlos Silva Filho, ISWA (International Solid Waste Association) President and CEO of ABRELPE
Luciano Piacenti, ATIAISWA ITALIA
Marco Ricci, (CIC Italian Composting and Biogas Association, ISWA)

Programme

14.00 Opening session (Institutional speeches)

14.05 Welcome by ISWA - Carlos Silva, President
Welcome by Ecomondo - Fabio Fava, Chair of the Scientific Technical Committee

PHA from waste and wastewater: drivers and constraints to the market

Language: Italian

Organized by: Ecomondo Scientific Technical Committee

PHAs are microbial polyesters and completely biodegradable in the environment. Although available for decades on the market, but at rather high costs, in more recent years they have been "discovered" starting from the evidence that PHA can be synthesized using mixed microbial cultures easily obtainable from wastewater treatment plants and using organic waste and/or sludge as a feedstock. This makes PHA particularly interesting both to better enhance these waste, in full harmony with the development of the bioeconomy and the circular economy, and to contribute to the European Plastic Strategy for replacing fossil-based plastics.

The numerous experiments carried out so far at the pilot scale, especially in Italy, have shown the technical feasibility of the technology and provided the first indications regarding the possible applications of PHA-based bioplastics. Therefore, all that remains is to take the last steps for the complete transfer to the industrial scale and the placing on the market of the PHA-based bioplastics, including regulatory and organizational aspects such as the business models that link together different industrial sectors, the consequent qualification of intermediates and products, the definition of "end of waste" criteria and the definition of "end of life" management systems.

On all these aspects, the workshop will offer an opportunity to present the most recent research and innovation experiences and to discuss with various operators in the industrial sectors concerned and public administration

Section Chairs

Mauro Majone, Ecomondo Scientific Technical Committee and University "La Sapienza", Rome
Francesco Fatone, Ecomondo Scientific Technical Committee and Marche Polytechnic University

Programme

14.00 Introduction by the Chairs

14.20-14.40 *Experiences and perspectives on producing PHA from organic waste (provisional)*

Mauro Majone, University "La Sapienza", Rome

14.40-15.00 *Experiences and perspectives on producing PHA from urban wastewater (provisional)*

Francesco Fatone, Marche Polytechnic University

15.00-15.20 *A key-step: how to define "End of waste" criteria for waste-based PHA*

Nadia Ramazzini, Ministero della Transizione Ecologica, Italian Ministry for ecological transition

15.20-15.40 *Biodegradability of PHA and how it fits into the organic recycling*

David Bolzonella, University of Verona

15.40-16.00 *(Almost full) scaling-up of PHA production from excess sludge: the Project Circular BioCarbon*

Andrea Lanuzza, Gruppo CAP

16.00-16.20 *Perspectives for the recovery of PHA from organic waste. Contarina's industrial approach*

Michele Rasera, Contarina SpA

16.20-16.40 *Widespread recovery of PHA in urban public services*

Francesco Avolio, representing the utilities HERA, IREN, SMAT and A2A

16.40-17.00 *Viticulture and winery byproducts and PHA: the Caviro's challenge for a new bio-compatible packaging*

Rosa Prati, Caviro

17.00-17.20 *PHA-based bioplastics: the challenge of applications*

Organized by: Ecomondo Scientific Technical Committee, Federchimica, ISPRA

Starting from a general overview of the Green New Deal, the Workshop aims to explore the resulting actions that affect many areas of the life of European citizens and companies operating in EU. Given the objective that the European Commission has set itself by adopting, in 2021, the action plan "Towards a Zero Pollution Ambition for air, water and soil – building a Healthier Planet for Healthier People" there are several factors at play. For example, although the essential role of chemicals for the well-being is recognized at the EU level, in the high standards of living and comfort of modern society, critical issues in manufacturing and use are also reported. So, even though the EU has already sophisticated laws on chemicals, it intends to manage them with further provisions that will need to be carefully evaluated both for the benefits they should bring but also for the impacts they could also have on businesses. The event will show the different implications of the many activities that are being studied at the EU.

Section chair

Francesca Giannotti, Ministry of Economic Development

Programme

14.30 Introduction

14.40-14.55 The Chemical Strategy for Sustainability: a source of other initiatives including the Sustainable Product Initiative
Sylvie Lemoine, Executive Director Product Stewardship, Cefic

14.55-15.55 **Challenges arising from a complex strategic European framework:**

14.55-15.10 *National policies for Zero Pollution*

Laura D'Aprile, Ministry of the Ecological Transition, Head of the Department for Ecological Transition and Green Investments (remote connection)

15.10-15.25 *The environmental framework and the Zero Pollution ambition*

Alessandro Bratti, General Director ISPRA - Italian Institute for Environmental Protection and Research

15.25-15.40 *Zero Pollution and public health*

Mariano Alessi, Ministry of Health, Prevention Director General, Competent Authority Unit REACH/CLP

15.40-15.55 *Challenges and opportunities for industry, first considerations*

Alessandra Colombo, President of Circular Economy Committee, Federchimica - Italian Federation of the chemical industry

15.55-16.15 *Digital Twins at Scale for Anyone Anywhere*

David McKee, CEO & CTO at Slingshot Simulations, Chair of the Digital Twin Consortium working groups on Terminology (3T) and Open Source

16.15-16.40 Discussion and closing remarks

14:30 - 17:30

Instruments for implementing the circular economy

Language: Italian

Organized by: Ecomondo Scientific Technical Committee and the National Centre of Waste and Circular Economy, ISPRA

In 2020 the new Action Plan on the circular economy was published and in September of the same year Italy closed the transposition of the so-called "circular economy package". In addition, the conclusions of the 2020 European Council and the resolution of the European Parliament of 10 February 2021 on the new action plan for the circular economy have completed the reference framework. The opportunity offered by the Recovery plan to fill the existing structural gaps will be a driving force for the future. The day represents an opportunity to evaluate the tools employed by our Country to implement the principles of the circular economy.

Section Chair

Valeria Frittelloni, Director of the National Centre of Waste and Circular Economy, ISPRA (Italian Institute for Environmental Protection and Research)

Luigi Palumbo, Ricicla TV

Programme

Institutional greetings

On. Chiara Braga e On. Giovanni Vianello, Italian Parliamentary Commission of Inquiry on Eco-Mafia

The actions of the Ministry for ecological transition. The point of the situation.

Laura D'Aprile, Head of the Department for Ecological Transition and Green Investments, Italian Ministry for Ecological Transition

Circular Economy and Consumers: the initiatives of the Ministry of Economic Development

Orietta Maizza, Head of the Consumer Policies, Regulations and Projects Division, Ministry of Economic Development (pre-recorded intervention)*

The SNPA and the essential levels of environmental performance

Fabio Carella, General Director of Lombardia Region ARPA (Regional Agency for the Protection of the Environment)

Innovation, infrastructures and citizen science as indispensable tools for the circular transition of territories

Roberto Morabito, Director of the Department for Sustainability of Productive and Territorial Systems, ENEA (Italian National Agency for New Technologies, Energy and Sustainable Economic Development)

Economic instruments at the service of the circular economy. The waste tax.

Lorenzo Bardelli, Director of the Environment Division, ARERA (Italian Regulatory Authority for Energy, Networks and Environment)

The contribution of environmental associations

Stefano Ciafani, President of Legambiente (Italian environmental association)

Conclusions

Alessandro Bratti, General Director of ISPRA (Italian Institute for Environmental Protection and Research)

ISPRA'S public and social value for Sustainability: what contribution is necessary for the effective implementation of the PNRR?

Language: Italian

Organized by ISPRA

The pandemic has accelerated the review of organizational processes in many public and private entities. ISPRA (Italian Institute for Environmental Protection and Research), anticipating this need, had already started an organizational innovation process in July 2019, with the aim of making its processes functional to the needs of its main stakeholder as well as to help the necessary skills required to achieve the objectives of the 2030 Agenda and of the European Green Deal emerge. This path is unavoidable today also in the light of the National Recovery and Resilience Plan (PNRR) for the implementation of which it becomes strategic to strengthen the methods of involvement of all those involved in various capacities, directly and indirectly. The Sustainability Report represents a tool to facilitate the achievement of these objectives and to integrate useful information for decisions, discussions, and the overall path that awaits us. In presenting its 2021 Sustainability Report (2020 data), the Institute asks a panel of stakeholders to discuss a specific question: how can ISPRA, as a Public Research Body (EPR), effectively support the implementation of the PNRR and more in general of the measures deriving from the Green Deal?

Programme

9.30-10.00 **Presentation of the 2021 Sustainability Report**

Institutional greetings

Stefano Laporta, President of ISPRA

ISPRA's reporting process: status and prospects

Tiziana Cianflone, Head of the organizational innovation Unit at ISPRA

10.00-11.15 **Round Table**

Monica D'Ambrosio (RICICLATV) moderates the round table.

Discussants:

Chiara Braga, Member of the Italian Parliament

Tullio Patassini, Member of the Italian Parliament

Pierluigi Stefanini, Spokesman of the Italian Alliance for Sustainable Development, ASviS

Marco Martuzzi, Director of the Environment Department at Italian National Institute of Health

Giuseppe Bortone, General Manager of Arpa Emilia-Romagna

Massimiliano Mazzanti, Director of the SEEDS Inter-University Research Center

Stefano Ciafani, National President of Legambiente

Filippo Brandolini, President of Hera Ambiente

The technological innovation of motor vehicles and the ELV supply chain

Language: Italian

Simultaneous translation: English

Organized by: Ecomondo Scientific Technical Committee and FISE UNICIRCULAR

The automotive sector is experiencing a real revolution, from both a technological and environmental point of view, with the transition from thermal engines to electric ones. These changes, linked above all to technological innovation, make it necessary to rethink the approach of the entire automotive supply chain, from production to the management of the vehicle and its components "from the cradle to the grave", with the aim of meeting the challenges and opportunities for the sector and to highlight problems and criticalities.

Section Chair

Anselmo Calò, President of FISE (Federation of Services Companies)

Program

10.00 Introduction by the Chairs

10.15-10.30 *The Revision of the ELV Directive: what do the European recyclers expect?*
Emmanuel Katrakis, Euric

10.30-10.45 Lucia Citro, officer of the Italian Ministry for Ecological Transition

10.45-11.00 *The prospects for technological innovation in cars*
Luca De Vita, ANFIA - Italian Association of the Automotive Industry

11.00-11.15 *The management and market of electric car batteries*
Luca Tepsich, CDCNPA - National Coordination Center for Batteries and Accumulators

11.15-11.30 *Pre and post shredding treatment to facilitate achievement of the objectives envisaged by Directive 2000/53*
Stefano Leoni, AIRA - Automobile recyclers industrial association

11.30-11.45 *The technological innovation of vehicles and car wreckers*
Alfonso Gifuni, CAR - Car wreckers confederation united

11.45-12.00 *The adaptation of car demolition systems and the technological innovation of vehicles*
Simone Pollini, ADA - Vehicle wrecker association

12.00-12.15 *The management of waste from the demolition of motor vehicles*
Antonello Di Mauro, ECOEURO

Critical raw materials and the new european action plan: strategies for a more secure and sustainable supply

Language: Italian

Organized by: Ecomondo Scientific Technical Committee, Key Energy Scientific Technical Committee, Italian Ministry of Economic Development (DGPIIPMI), ENEA, National Critical Raw Materials Table

The issue of secure and sustainable supply of raw materials has been identified as a priority by Europe, starting with the 2008 Raw Materials Initiative and continuing with the European Raw Materials Partnership (EIP Raw Materials) and the recent European Raw Materials Alliance (ERMA). In particular, the critical raw materials that are most strategic for Europe have been identified, in terms of supply needs and criticality for the production system. Some raw materials are only available as primary resources in a few (non-European) countries in the world that have a monopoly on their market. The pandemic emergency has undoubtedly exacerbated the criticalities that were already present. The costs of some raw materials have risen significantly, and future scenarios show that the cost of raw materials will have an increasingly substantial impact on the competitiveness of the production system. In Italy, in particular, the National Recovery and Resilience Plan provides for numerous investments for the energy and digital transition and for sustainable mobility, which are based on the ability to sustainably and competitively supply critical raw materials. As our country risks becoming increasingly dependent on countries that produce critical raw materials, major actions are urgently needed to promote the recycling and substitution of critical raw materials.

Chairs

Giacomo Vigna, Italian Ministry of Economic Development
Roberto Morabito, Director of the Territorial and Production Systems Sustainability Department - ENEA (Italian National Agency for New Technologies, Energy and Sustainable Economic Development)

Programme

9.30 Introduction

Mario Fiorentino, Directorate-General for Industrial Policy, Innovation and SMEs, Italian Ministry of Economic Development

Critical Raw Materials: Risks and Opportunities for the Country System

Claudia Brunori, ENEA (Italian National Agency for New Technologies, Energy and Sustainable Economic Development)

10.00-10.15 ERMA - *The European Raw Materials Alliance: the state of the art*

Pierluigi Franceschini, EIT RawMaterials CLC South

10.15-10.30 *Critical raw materials: the initiatives of the Ministry of Economic Development*

Maria Grazia Verdura, Ministero of Economic Development

10.30-10.45 *Information needs on the extraction of non-energy raw mineral resources: ISTAT statistics contribution*

Donatella Vignani, ISTAT (Italian National Institute of Statistics)

10.45-11.00 *Italian and European deposits of critical raw materials*

Fiorenzo Fumanti, ISPRA (Italian Institute for Environmental Protection and Research)

11.00-11.15 *Urban mining as a sustainable supply of critical raw materials*

Federica Forte, ENEA (Italian National Agency for New Technologies, Energy and Sustainable Economic Development)

11.15-11.30 *Responsible business conduct standards in battery mineral supply chains*

Luca Maiotti, OECD (pre-recorded intervention)

11.30-12.45 Round table - *From waste treatment to advanced materials and substitution: research and innovation on critical raw materials*

Critical raw materials from WEEE

Danilo Bonato, ERION (Multi-consortium system for the management of waste associated with electronic products)

Innovative approaches to phosphorus recovery from sludge

Giulia Sagnotti, ACEA

Critical raw materials and sustainable mobility

Gabriele Ciaccio, Centro Ricerche Fiat

Critical raw materials for storage

Federico Vitali, FAAM Company (production and recycling of lead-acid and lithium batteries)

Sustainable rubber supply

Renzo Maggiolo, UNIRIGOM (Union of Italian rubber recoverers)

The role of the bio-based industry for a healthy planet in the post-covid era

Language: Italian

Organized by: Ecomondo Scientific Technical Committee & Italian Technology Cluster SPRING

As reported by the Intergovernmental Science-Policy Platform on Biodiversity and Ecosystem Services (IPBES) in 2020, pandemics will emerge more often in the future, unless there is a transformative change in the global approach of those same human activities that impact on ecosystems. According to IPBES, prevention would be 100 times cheaper than the cost of responding to pandemics. In this context, the bio-based industry can represent an essential element to ensure the green transition envisaged by the Green Deal, reconciling the economy with society, the environment and human health. Indeed, all the different bio-industry sectors could play a key role in the creation of local low-impact value chains, in which waste represents the lifeblood for the production of new sustainable materials, products and services. The evolution of this sector towards a growing circularity and towards a greater integration of industry, agriculture and urban centers will be fundamental to face the multiple interconnected challenges of the twenty-first century, mitigating the impact of climate change, regenerating degraded soils and ensuring competitiveness and the creation of new jobs.

Based on these premises, the conference aims to present the case studies of circular bioeconomy, which have made Italy a pioneer in the sector at European level and to bring out the obstacles that still remain for a full implementation of the circular bioeconomy in our country.

Section Chairs

Mario Bonaccorso, Director of Cluster SPRING - *Sustainable Processes and Resources for Innovation and National Growth*

Programme

10.00 Welcome

Leonardo Salvemini, representative of the Ministry for Ecological Transition to the Italian National Bioeconomy Coordination Board

Introduction by the chairs

Presentation of the first report on circular bioeconomy in Italian companies

Piergiuseppe Morone, Unitelma Sapienza – University of Rome

The Bio-Based Industries Joint Undertaking and the future Circular Bio-Based Joint Undertaking as catalysts for a green transition in Europe

Virginia Puzzolo, Head of Programme of Bio-based Industry Joint Undertaking (BBI)

10.30 Circular bioeconomy best practices in the urban environment

The Italian bioplastics and biochemicals value chain

Carmine Pagnozzi, Technical Director of Biorepack

Sustainable solutions for better management of organic carbon in cities

Filippo Gavazzeni, Milan Food Policy (TBC)

Urban organic waste as a resource for new municipal biorefineries

Massimo Centemero, General Manager of the Italian Composting Consortium

From sewage sludge to new innovative bioproducts

Tania Tellini, Coordinator of Water Sector Utilitalia (Italian federation of energy, water and environmental services)

From waste to secondary raw material: the case study of paper and cardboard

Claudio Busca, Head of General and Institutional Affairs Comieco

11.30 Bioeconomy from agriculture and for agriculture

From waste to bioenergy

Silvia Buzzi, HSE manager Caviro Extra

The circular bioeconomy for sustainable agriculture

Francesco Ciancaleoni, Environment and Territory Area of Coldiretti (Federation of Italian Farmers)

Sustainable biomass at the service of the bio-based industry

Alessandro Bettoni, FNP Bioeconomy President of Confagricoltura (General Confederation of Italian Agriculture)

Low-impact agriculture and landscape protection - the case study of the Pantelleria Park

Andrea Distefano, Head of Business communication and special projects Novamont

12.20 *Promoting biotransition through communication, education and involvement of stakeholders*

Susanna Albertini, FVA New Media Research

Marine litter and aquaculture: studies, experiences and policies to take stock of the situation at Mediterranean level - ENGLISH LANGUAGE SESSION

Language: English
Simultaneous translation: Italian**Organized by: Ecomondo Scientific Technical Committee, Legambiente, University of Siena, Life Muscles**

Nets and tools from fishing and aquaculture activities, lost or abandoned or thrown into the sea, represent about 27% of the plastic waste found on European beaches and a greater proportion in weight, reaching up to 11 thousand tons per year. At EU level only 1,5% of fishing gears are recycled. Impacts on marine fauna, including fish stocks are several and still underestimated. These important economic sectors generate and, in turn, suffer the impact of waste dispersed in the marine environment, and there is a need to accelerate the development of a [circular economy](#) strategy approach. Awareness activities and direct involvement of fishermen and aquafarmers in collecting marine waste and used nets are essential to make this important sector [more sustainable](#). Virtuous experiences of recycling and experimentation of new less impacting materials are already active and planned, they have to be promoted and expanded. Effective cross-border and cross sector cooperation in the implementation of existing policies and exchanging best practices could help to act at the Mediterranean scale. The conference will deliver practical case studies, experiences and policies to take stock of the situation at European and Mediterranean level.

Section Chairs

The Italian Circular Economy Stakeholders Platform initiatives within the CEAP - SESSION WITH STREAMING IN ENGLISH LANGUAGE

Language: Italian
Simultaneous translation: English

Organized by: Ecomondo Scientific Technical Committee, ENEA and ICESP

The European Circular Economy Action Plan published on March 2020 is one of the main building blocks of the European Green Deal. It calls for action on legislative and non-legislative measures targeting those areas with more potential of bringing real added value at the EU level. High relevance is given to multistakeholder and intersectoral hubs, as key to finding winning solutions for closing the loop along value chain and inside the cities and the territory. The network governance can power the circular economy by strengthening the positive forces in society, fostering dialogue and synergic relations and facilitating inter-sectorial interactions among all the actors which are involved in the CE transition. Within this frame, the Italian Circular Economy Stakeholder Platform, operating since May 2018 as national mirror of the ECESP and counting on more than 250 multi sectoral participating organizations, has recently reorganized its working groups answering to the 2020 CEAP and to the emerging priorities the priorities for a post-COVID-19 recovery, identified by ICESP community at the end of 2020. Moreover, since multidisciplinary approach and dissemination of good practices (GP) can inspire the transition towards circular economy, ICESP collected more than 180 Italian GPs through WGs meetings and consultations, with open access on www.icesp.it. These are monitored and analysed in terms of replicability, maturity, impact quantification for both the value chain and the territorial approach. The conference will be the occasion for giving a glance on ICESP ongoing activities, good practices and perspectives in line with European initiatives.

Section Chairs

Roberto Morabito, Director of ENEA (Italian National Agency for New Technologies, Energy and Sustainable Economic Development) Department for Sustainability and ICESP (Italian Circular Economy Stakeholder Platform) President
Fernanda Parvini, ENEL (Italian multinational manufacturer and distributor of electricity and gas) and ICESP Coordination Committee representative

Programme

10.00 Introduction by the Chairs

10.20-10.40 *Circular Economy Action Plan*
Paola Migliorini, European Commission DG Environment, Unit B1 – Sustainable Production, Products and Consumption

10.40-11.00 *The work of ECESP and leadership group on “network and governance”*
Ladeja Godina Košir, Chair of the Coordination Group of the European Circular Economy Stakeholder Platform (ECESP)

11.00-11.20 The role of standardisation for the circular transition
Elena Mocchio, Head of Innovation and development Unit, UNI – Italian Standardisation Body

Organized by: Ecomondo Scientific Technical Committee and H2020 project Electra

Bioremediation offers low impact approaches to clean polluted soils, sediments, groundwater or wastewater. Yet in the environment, electron flow typically limits degradation, and it is difficult to control. Electro-microbiology can overcome this major hurdle. Microorganisms interacting with solid- state electron donors or acceptors can be deployed within many different matrices, for different pollutants and using diverse technological approaches minimizing or eliminating energy and/or chemical needs. This workshop will highlight the capacity of bio-electrochemical processes to tackle water pollution, such as nitrate in drinking water resources, pharmaceutical residues in wastewater and chlorinated compounds in groundwater.

Section Chairs

Nicolas Kalogerakis, Technical University of Crete
Ilaria Pietrini, ENI SpA, TEAMB – Environmental and Biological Laboratories. Research & Technological Innovation

Programme

14.00 Welcome, ELECTRA Dissemination Manager

14.05-14.10 *The ELECTRA project - an EU-China initiative for enhancing bioelectro-chemical systems in bioremediation*

Philippe Corvini, FHNW, ELECTRA Project Coordinator

14.10-14.20 *The ELECTRA technologies approaches: a portfolio of innovative solutions for pollution challenges*

Korneel Rabaey, Ghent University, ELECTRA Scientific Project Coordinator

14.20-14.40 *Performance and application cases of METLAND electroactive biofilters to eliminate organic micro-pollutants in municipal wastewater*

Abraham Esteve Núñez, Metfilter S.L.

14.40-15.00 *Fluidized-bed and fixed-bed BES reactors for nitrate-polluted groundwater bioremediation*

Sebastià Puig, University of Girona

15.00-15.20 *Treating CAH contaminated groundwater with a Sequential Bioelectro-chemical Groundwater Circulation Well (GCW) Process: from the lab to the field.*

Marco Zeppilli, Sapienza University Rome; Marcel Alesi, IEG Technologie GmbH

15.20-15.40 *Technology benchmarking under environmental and economic aspects*

Christoph Hugl, FHNW

15.40-16.15 Discussion and Closure (by the chairs)

14:30 - 16:30

The green transition: a route between safety, research, innovation in energy sector

Language: Italian

Organized by: Ecomondo Technical Scientific Committee, Energy and Climate Department of the Ministry of Ecological Transition, CLYPEA Innovation Network for Future Energy

The CLYPEA network, strongly supported by the Italian Ministry of Economic Development – DGS UNMIG, comprises from 2014 the best actors in the scene of offshore safety in mining activity. In these last years, the Network has evolved following the logic of transition from traditional to renewable energy, asserting itself as an innovation hub able to explore some of the research topics most challenging in energy field. The workshop will outline a route for the Green Transition between safety, research, innovation in energy sector, through the activities carried out by the experts of the CLYPEA Network and constant debate with the Institutions, according to current criteria of efficiency, effectiveness and return in knowledge value.

Section Chair

Energy and Climate Department of the Italian Ministry for the Ecological Transition

Programme

14.00-14.10 Introduction by the Chair

14.10-15.10 *H&RA Lacinia Project: offshore safety in mining activities, a cooperation example between ex-perts and Institutions*

Chairperson: Daniela Di Bucci, Italian Department of Civil Protection

Will take part:

Francesca Colucci, Research Energy System, RSE

Andrea Argnani, Institute of Marine Sciences - National Research Council ISMAR-CNR

Andrea Prota, Seismic and Structural Engineering University Laboratories Network, RELUIS

Fabio Germagnoli, EUCENTRE Foundation European Centre of Education and Research in Seismic Engineering;

Irene Molinari, National Institute of Geophysics and Volcanology, INGV

Alberto Armigliato, University of Bologna

15.10-15.50 *Safety for energy Infrastructure as a key role for transition*

Chairperson: Ezio Mesini, President of the Offshore Committee

Will take part:

Captain Daniele Panebianco, Italian Navy

Andrea Carpignano, Turin Polytechnic

15.50-16.00 Discussion and conclusion by the Chair

Energy and Climate Department of the Italian Ministry for the Ecological Transition

CLYPEA, Innovation Network for Future Energy

14:30 - 16:30

Gemini Room C4 Pav.
